Part 3

Sutta Commentary

By Piya Tan ©2002, 2021

§1.1 The Kālāmas of Kesaputta

1 The Kesaputtiyas were the people of Kesaputta (or Kesamutta): they were better known as Kālāma (A 1:188). It has been suggested that they may be identical with the Kesins of the Śatapatha Brāhmaṇas. Kālāma is probably the name of a clan (gotta; Skt gotra). Kesamutta is a market town (nīgama) in Kosala belonging to the Kālāmas, who were kshatriyas (AA 2:304). Among the well known members of this clan are the ascetic Bharanđu Kālāma (A 3.124), and the Āḷāra Kālāma, the teacher of Gotama before his awakening. Both Bharanđu and the recluse Gotama have lived together as pupils of Āḷāra.

2 The Bharanđu Sutta (A 3.124) records the Buddha as instructing Mahānāma on 3 kinds of teachers: the first teaches the full comprehension of sense-desires, but neither of sense-objects nor feelings; the second teaches the full comprehension of both sense-desires and sense-objects, but not of feelings; but the third teaches the full comprehension of all three. The Buddha asks Mahānāma whether their accomplishment (niṇṭṭha) is one and the same (eka) or different (puthu). Bharanđu tells Mahānāma that they are all different. Taking this as a snub by the Buddha, Bharanđu leaves, not to return any more.

3 Although neither the Sutta nor the Commentary mentions where exactly the Buddha and the monks stays during this sojourn in Kesaputta country, the Chinese version states that it is the simṣapa grove (onomatopoeic). Often such information, not corroborated in the Pali version, would be found in the Commentaries. However, here the Commentary and Subcommentary are silent.

§1.2 “It is said, sirs, that the recluse Gotama ...”

This is a stock passage to show that the Kālāmas are well acquainted with the Buddha’s background. This paragraph denotes the Buddha’s social status (in the minds of the Kālāmas and the world), which adds a significant sense of charisma to his personality.

§1.3 Now a good report about that Master Gotama ...

1 This section declares the presence of the 3 jewels in the world. Paragraph 1, beginning “The Blessed One is an arhat … ,” is the traditional verse for the recollection of the Buddha (Buddhânussati) in his nine virtues, and reflects his spiritual status to the world.

2 Paragraph 2, beginning “Having realized by his own direct knowledge … ,” is a statement of the Buddha’s self-awakening and that he is a world-teacher, capable of liberating all beings throughout earth and heaven.

3 Paragraph 3, beginning “He teaches the Dharma … ,” is a brief description of the Dharma. The full verse on the recollection of the Dharma, on its 6 virtues, runs thus: 10

(1) Well taught (svākkhāto) is the Dharma;
(2) it is visible here and now (sandīṭṭhika), sometimes rendered as “to be seen for oneself”;
(3) it has an immediate effect (akālika);
(4) it invites and entails personal verification (ehi,passika);
(5) it is accessible (opanayika); alternately, it “brings on progress”;
(6) it is to be personally realized by the wise (paccattamā veditabbo viññūhi).

4 The phrase, “good in the beginning,” refers to the moral virtue (sīla-khandha) training of the teaching, and is essentially stated as in the first virtue, “well taught.”

5 The phrase, “good in the middle,” refers to the mental cultivation (samādhi-khandha) training of the teaching, which is represented by virtues 2-3: [3]

(2) mental cultivation and mindfulness make one see the Dharma in this life itself;
(3) the benefits of mental training are immediate, and also allows one to have an experience of the timelessness of reality;

6 The phrase, “good in the end,” refers to the wisdom (paññā-khandha) training of the teaching, which is represented by virtues 4-6: [3]

(4) the Dharma is meant to be tried and tested, like food for the hungry or medicine for the ill, which represents the first stage of Buddhist training or discipleship: this is the level of the “good worldly”;
(5) the Dharma immediately becomes “accessible,” that is, one begins to understand it, so that it “brings on progress” on the spiritual path: in this life itself, one will attain at least streamwinning, if not arhathood; and
(6) the Dharma can fully awaken one so that one reaches the highest spiritual state, that of the arhats, the truly wise ones.

Hence, the phrase, “good in the beginning, good in the middle, good in the end” refers to the 3 trainings (ti, sikkhā), that is, the training in moral virtue, in mental concentration, and in wisdom. 11

7 The phrase, “both in the spirit and in the letter” refers to the two aspects of the teachings as idea and as form. Traditionally, this is explained as follows in the Visuddhi, magga:

---

9 See Buddhânussati, SD 15.7.
10 D 2:92 (Vism 216); M 27,11/1:179 = 38,31/1:267; A 1:156 (see AA), 227 (AA); Sn 567 (SnA) = M 92 (MA), Sn 1137 (Nc, NCA, SnA); S 2:58 = 4:328. For a traditional comy, see Vism 7.69-75/213-215. See DhammadnPussati, SD 15.9.

http://dharmafarer.org
It is (well-taught) “in the spirit” (sattthāṁ) because it is perfect (sampatti) in meaning, and it is (well-taught) “in the letter” (savyañjanaṁ) because it is perfect in the details.

It is (well-taught) “in the spirit” because it conforms to the words declaring its meaning by way of explanation, proclamation, revelation, analysis and clarification. It is (well-taught) “in the letter” because it is perfect by way of syllable, word, the letter, style, language and exposition.

(Vism 7.72/214)

8 The spirit (attha) of the teaching is preserved through personal practice, especially through proper instructions from accomplished teachers and from personal realization. The word or letter (pada) of the teaching refers to the aural [by ear] or oral [by mouth] tradition, that is, the phrasing (vyañjana) and sound (ghosa) of the teaching, and to the written texts properly recorded, preserved and transmitted.

Those who are quick in understanding and realizing the true teaching are able to grasp its spirit, that is, its meaning directly. Those who begin their spiritual training with the letter of the Teaching take a more gradual path, through 3 stages:

1. hearing the Teaching on the word level (suta, mayā paññā),
2. reflecting over the Teaching (cinta, mayā paññā), and
3. cultivating a direct experience of reality (bhāvanā, mayā paññā). (D 3:219; Vbh 324) [3.2]

§1.4 “It is good to see arhats such as these”

1. **The benefit of seeing recluses**

1.1 Since the only means of Dharma transmission in the Buddha’s time is that of the aural tradition, one has to be in the presence (santike) of the Teacher and within sight (dassana) of him, in order to benefit from the Teaching. However, even when the listener is still unable to immediately understand the teacher’s word, the frequent, patient and responsive way of listening would in due course bring liberating wisdom upon one. This is clearly stated in the ninth stanza of the Maṅgala Sutta (Kh 5.9 = Sn 266):

\[
\begin{align*}
\text{khantī ca sovacassatā} & \quad \text{Patience, being tractable [being responsive to instruction],} \\
\text{samāṇo nañ ca dassanaṁ} & \quad \text{Seeing the recluses [especially left-home practitioners],} \\
\text{kāleṇa dhamma, sākacakā} & \quad \text{And timely Dharma discussions—} \\
\text{etam maṅgalam uttamaṁ} & \quad \text{This is the highest blessing.}
\end{align*}
\]

I have translated the abstract noun dassana\(^{12}\) (Skt darśana), “seeing, sight, vision” as “darshan,”\(^{13}\) a loan word from modern Hindi. This shows the importance and popularity of the practice of viewing holy persons such as the Buddha. I have used the modern Indian word “darshan” to reflect the original cultural and religious background that applies here. The ancient Indians who came to “see” the Buddha, did just that: they regarded

---

\(^{12}\) It comes from the verb dassati = dakkhati, dakkhit, “he sees.” The word dassana appears a total of at least 12 times in Mahāparinibbāna S (D 16), all in ch 5 (§§5.7 (x2), 5.15 (x5), 5.19, 5.20, 5.24, 5.24, 5.25), the Kusinārā Chapter: see SD 9 (7.5(i)).

\(^{13}\) Webster’s 3rd International Dictionary on **darshan**: “a blessing held by various Hindus to consist in the viewing of an eminent person (as a religious leader).” See Trainor 1997:177 f & McMahan 1998:10 (digital).
this mere gazing on a holy person to bring upon them great blessing, and also to be in the sight of a holy person was just as blessed. This, in fact, is often the case for the modern traditional Indians, too.\textsuperscript{14}

1.2 The Mahā,parinibbāna Sutta contains two important passages relating to dassana as “seeing” a holy person, and where we can tease out a good understanding of the Buddha’s teaching regarding it. The first passage is the Upāvāṇa episode (D 16.5.4 f) where the Buddha abruptly instructs Upāvāṇa, who is fanning him, to step aside. When asked by Ānanda, the Buddha replies that numerous devatas (heavenly beings) have assembled “for the sight of the Tathāgata” (D 16.5.5). The more worldly devatas lament: “Too soon will the Eye in the world disappear!” The second passage concerns the 4 holy places, of which the Buddha declares: “Ānanda, there are these four places that should be seen by the faithful son of family so as to rouse samvega [a sense of urgency].” (D 16.5.8.1)\textsuperscript{15}

2 The benefits of faith

2.1 The statement, “It is good to see such arhats” (sādhu kho pana tathā, rūpānaṁ arahataṁ dassanaṁ hoti ti), clearly attests to the faith (saddhā) of those (or most of those) who have approached the Buddha. Faith is an effective beginning of the spiritual path. The Kālāmas have, in fact, been suffering from doubt and confusion on account of the claims and counter-claims of the various religious teachers and speakers who visit them. This suffering leads them to see the Buddha, in whose teaching their faith arises. The Upānisā Sutta (S 12.23) actually declares that suffering leads to faith and on to arhathood in this manner:\textsuperscript{16}

\begin{align*}
\text{Ignorance} & \leftrightarrow \text{Suffering} \rightarrow \text{faith} \rightarrow \text{gladness} \rightarrow \text{zest} \rightarrow \text{tranquillity} \rightarrow \text{happiness} \rightarrow \text{concentration} \rightarrow \\
\text{knowledge and vision} & \rightarrow \text{revulsion} \rightarrow \text{dispassion} \rightarrow \text{freedom} \rightarrow \text{the destruction of mental influxes (arhathood).} \textsuperscript{17}
\end{align*}

2.2 In the case of the Kālāmas, they or a significant number of them apparently accept the Buddha’s teachings after pondering on them (dharmā nijjhānaṁ khamanti) and as a result become streamwinners, as suggested by their going for refuge at the end of the discourse (as in the case of Bhaddiya in a similar discourse).\textsuperscript{18} Their process of spiritual awakening forms a part of “the gradual training” (anupubba, sikkhā) of the Kīṭāgiri Sutta (M 70), that is, up to stage (8), thus:\textsuperscript{19}

(1) Faith (saddhā) conduces one to visit (that is, to see) a teacher.
(2) Visiting (upasaṅkamana) the teacher conduces one to respectfully attending to the teacher.
(3) Respectfully attending (payirūpāsanā) to the teacher conduces to giving ear.
(4) Giving ear (sota, vadhāna) conduces to hearing the Dharma.

\textsuperscript{14} See Pratyupanna-Buddha-Sānimukha, vasthita-samādhi Sūtra (tr Harrison, 1990) §14H. Lawrence Babb, “Glancing: Visual interaction in Hinduism,” 1981:396 f, has shown that Hindus not only wish to see their deities, but also wish to be seen by them.

\textsuperscript{15} For a useful discussion, see Kevin Trainor, Relics, Ritual, and Representation in Buddhism, 1997:174-176.

\textsuperscript{16} S 12.23/2:29-32 @ SD 6.12 & Dependent Arising, SD 5.16 (18C).

\textsuperscript{17} On mental influxes (āsava), see Intro 5.3(1).

\textsuperscript{18} Bhaddiya S (A 4.193/2:190-194), SD 35.10 contains the same 10 doubtworthy points & the section on the roots (§§3b-15a). Comy says that at the end of the discourse, Bhaddiya becomes a streamwinner. (AA 3:173)

\textsuperscript{19} This sequence is from Kīṭāgiri S (M 70), but the terms are from Caṅki S (M 95). See foll n.
2.3 The Caṅkī Sutta (D 95), too, mentions these 12-stage gradual progress—but in reverse—and which it says leads to “the final attainment of truth” (saccānupatti), that is, arhathood.22

This exhortation is effectively a “psychology of learning” in a few lines. The learning process is not just a matter of rote or book-learning, but of spiritual friendship with the teacher (1-4), which in turn is a fertile ground for learning (5-8), which leads to efforts in spiritual change (9-12) and realization. We also see here a more elaborate exposition of the Maṅgala Sutta quatrain on the four qualities beginning with patience (Kh 5.9 = Sn 266) mentioned above [1.4(1)].

2.4 It is interesting to see how “being convinced of the teachings after pondering on them” (dhammā nijjhānam khamanti) gives the positive counterpart of the doubtworthy point known as diṭṭhi, nijjhāna,khanti [Comy 3a(8)]. Here we see the proper context of pondering (through wise attention) on a teaching as a spiritual exercise, and as not a cursory or biased acceptance of [being convinced of] a view after some thought [Intro 5.3].

§2 “Bhante, there are some recluses and brahmins ... we are uncertain and in doubt: Which of these good recrules speak truth and which speak falsehood?”

According to the Āṅguttara Commentary, the town of Kesa,putta is located at the edge of a forest. Various groups of wanderers would stop there to spend the night before crossing the forest (or on emerging from the forest). During their stay, they would give talks to the Kālāmas, so that they are exposed to a wide range of religious and philosophical ideas (AA 2:305). Understandably, such a bewildering range of views causes doubt and perplexity in the minds of the Kālāmas.23

§3.0 The 10 doubtworthy points and related suttas

1 The 10 DOUBTWORTHY POINTS AND RELATED TEACHINGS

20 The phrasing here shows or suggests how dhamma, nijjhāna, khanti should be resolved, ie with dhamma as pl.
21 Be Ee: Pahiṭ'atto samāno kāyena c'eva paramaṁ saccaṁ sacchikaroṭi, paññāya ca naṁ atṭivijjha passati. Here, Caṅkī S (M 95) has: “Striving (padhāna) conduces to the attaining of truth (saccānupatti).” M 95,21/2:173 f (SD 21.15). Both passages mean the same thing. Comy on Caṅkī S says that saccānubodha means “awakening to the path” (maggānubodha), and saccānupatti means “realization of the fruit” (phala, sacchikiriyā) (MA 3:427).
22 M 95,21-33/2:174-176 (SD 21.15).
23 A very similar commentarial remark (MA 3:115 f) is given in connection with Apanṇaka S (M 60,4/1:401), SD 35.5.
1.1 The passage on the 10 doubtworthy points (*kañkhāniya-ṭ,ṭhāna) does not have any verb at all, but which is supplied by the Sutta Commentary as mā gaṇiṭṭha, “do not take hold of (a notion)” (AA 2:305). A number of translators have rendered this idiomatically as “do not go by ...” rather than being literal, technical or prolix, with such renditions as “Do not accept anything through ...” or “Do not hold on to a notion on account ...,” although these may serve as explanations or amplified translations.

1.2 It is curious that this key section on the 10 doubtworthy points is completely absent from the Chinese version, MĀ 1624 [SD 35.4b]. It depicts the Buddha as not asking the Kālāmas to judge for themselves and resolve their doubts. Then, he advises them not to give rise to doubt and perplexity, telling them outright: “You yourselves do not have the pure wisdom with which to know whether there is an afterlife or not, Kālāmas. You yourselves do not have the pure wisdom to know which deeds are unwholesome and which are not unwholesome, Kālāmas.”

Then, he categorically tells them what he himself has known these by direct experience. He explains to the Kālāmas the 3 unwholesome courses of action and how they are breached; and then he explains the 10 wholesome courses of action, in a similar way as those found, for example, in the (Dasaka) Cunda Sutta (A 10.176),26 SD 59.10, on the threefold purity, and the Niraya,sagga Sutta 1 (A 10:200),27 on rebirth in a heaven.

2 Related Suttas

The 10 doubtworthy points are not an isolated teaching, but found elsewhere in the Pali canon. We see them in at least 2 other important discourses, both found in the Aṅguttara, as follows:

2.1 *Saḷha Sutta* A 3.66/1:193-197 SD 43.6
2.2 *(Licchavi)* Bhaddiya Sutta A 4.193/2:190-194 SD 45.8 (1.3).

2.1 The *Saḷha Sutta* (A 3.66), basically, presents the same teaching given by the Buddha in the Kesa,puttiya Sutta (A 3.67): the 10 doubtworthy points, the 3 unwholesome roots, the 3 wholesome roots, and the 4 divine abodes. In A 3.66, they are given by the the arhat Nandaka to 2 young laymen, Saḷha and Rohana.

2.2 The *(Licchavi)* Bhaddiya Sutta (A 4.193) shows the Buddha teaching the Licchavi layman, Bhaddiya, the same 10 doubtworthy points, along with “the 4 social biases”—how people tend to behave socially—that is, the qualities of greed, hate, delusion and impetuosity. Bhaddiya goes for refuge and then becomes a streamwinner.

§3.1 (1) “Do not go by tradition [aural tradition]” (mā anussavena)

1 In the Buddha’s time, there were two predominant systems of religious thinking: the established Vedic system of the brahmins (brāhmaṇa) and the reform movement. The traditional brahmins claimed that their religion originated from the primal being (purusa) and was handed down aurally [by ear] and exclusively through successive generations of brahmins. Their system was, in reality, mostly text-centred and ritual-based, like most other major religions. It also claimed that its was preserved by a lineage based on secret knowledge shared only amongst initiates. If so, then, no one would know whether it was based on truth or falsehood.

---

24 MĀ 16 (T1.26.438b14-438c21), SD 35.4b. On the Madhyama Āgama, see SD 58.1 (5.4.5.4 (2)).
26 A 10.176/5:263-268 (SD 59.10).
2 The reform movement, on the other hand, consisted mainly of recluses (Skt śramaṇa; P samaṇa) who, like the Buddha, based their teachings on personal realization through mental cultivation and reinterpreted religiosity as an inner experience, attainable through personal effort, that is, without the mediation of priest or brahmin. A good case in point is that of *karma*, which, according to the brahmins, meant rituals and sacraments, of which only the brahmins had the power and privilege to perform, while the Buddhists and Jains regarded it as *volitional action* for which one was morally accountable.28 The reform movement, however, also included non-religious groups such as the materialists (ancestors of the Cārvāka).

3 Modern scholars, such as Jayatilleke,29 generally agree that *anussava* here probably refers to the “sacred Vedic tradition,” that is, the brahminical aural tradition. In rejecting *anussava* as a valid source of knowledge, the Buddha directly challenges the religious authority of the brahmins. Of course, this doubtworthy point of *anussava* does not only apply to the brahminical tradition, but also to all forms of traditional authority, including Buddhist sectarianism.

4 The Sandaka Sutta (M 76) throws more light on why *anussava* is not a satisfactory means of knowledge. In the Sutta, Ānanda explains that a teacher who is a traditionalist (*anussavika*) may uphold a teaching that is “traditionally handed down” (*itiha,itiha,paramparā*), taking it to be “scriptural authority” (*piṭaka,sampadā*). However traditional or “authoritative” a traditionalist teaching may be, one that is based on *anussava* must have the following possibilities:

- it might be well-remembered;  
- it might be ill-remembered;  
- it might be true;  
- it might be false.

Seeing that such a traditional or dogmatic religion based on *anussava* is unsatisfactory (*anassāsika*), an intelligent person, becoming disillusioned with it, would leave.30

5 In a broad religious sense, *anussava*, “what is repeatedly heard,” refers to religious tenets and teachings that have been handed down, that are to be accepted without question, especially those that cannot be personally verified. This would include religious prophecies, revelations, miracles (including reports of miracles) and “official” religious doctrines.

6 In our own times, this first doubtworthy point applies to our traditional religions and customs. Many of the traditions, customs and practices we see during the rites of passages—especially those of birth, marriage and death—have been handed down from our collective past. Some of these practices, such as new year home-gatherings and communal fellowship, have a healthy socializing value. Practices that are superstitious, alienating, wasteful or exploitative should be rejected or modified into something relevant to our personal and social development.

28 It should be noted here that the Buddha does not import wholesale the notions of karma and rebirth from pre-Buddhist systems. For one, they are still not fully developed systems during his time, and, they are bound by the conventions and terms of the day. Clearly, then, when the Buddha adopts such terms he also adapts them, giving them new meanings and uses. This is called “natural adaptation”: SD 1.8 (1.5+1.6); SD 39.3 (3.3.4). See also Jayatilleke 1963:369-376.

30 So anassāsīkaṁ idam brahma,cariyan ti iti viditvā tasmā brahma,cariyā nibbijja pakkamati (M 76,28/1:520), SD 35.7. See also Jayatilleke 1963:185-187.
§3.2 (2) “Do not go by lineage [received wisdom]” (mā paramparāya)

The Pali word paramparā simply means a “series or succession” (PED) and can refer to either teachers, or to teachings, or both. In the former case, paramparā of teachers, we have the Buddha comparing the lineage of Vedic teachers to “a close line of blind men, clinging together, of whom the front end sees not, the middle section sees not, and the tail end sees not, too” (anda,veni,paramparām saṃsattā purimo’pi na passati majjhimo ‘pi na passati pacchimo ‘pi na passati, D 1:239; M 2:170).31

Paramparā can also refer to an “unbroken line of the teaching,” as in the phrase, itiha,itiha,paramparā (Skt aitihya,pāramparyya),32 “a teaching successively handed down,” that is, a lineage or pedigree. In either case, the continuity of teacher or teachings, or of both—as in the case of the Chan and Zen traditions—are regarded as the authenticity and authoritativeness.33 Here, the authority is less in truth, but more in tradition.

However, as Jayatilleke notes:

Today, it may appear strange as to why anyone should accept an assertion merely because it is alleged to be of blind men, or even more so if the assertions are not assessed on their own merits—tradition wavers. But in the context of Ancient India, we must not forget that the antiquity of a conception is often assessed as itself a criterion in favour of its acceptance. This was probably the reason why the Jains and later even the Buddhists vied with each other in claiming the antiquity of their respective traditions.

(Jayatilleke 1963:195 §296)

§3.1 (3) “Do not go by hearsay” (mā iti,kirāya)

1 Iti,kirā (f)34 is a common expression simply meaning “hearsay” (PED). There is variant reading, iti,kiriyāya, which is sometimes preferred by the editors (eg Poussin and Thomas) to iti,kirāya (Nm 400, ed Poussin & Thomas).35 However, as Jayatilleke has pointed out:

The Niddesa represents a later stratum within the Canon itself, as it is a commentary on two sections of the Suttanipāta and the form itikiriyāya is either due to an attempt to “correct” itikirīya on the misunderstanding that the nominal base is itikirīya- or is the result of an attempt to form an abstract noun, viz *itikirya- > itikirīya- which by contamination with kirīya gives itikirīya for the instrumental case. The earlier form itikirīya is certainly to be preferred as the more authentic reading.

(Jayatilleke 1963:195 §297)

2 While the Kesa,puttiya Sutta has the reading mā iti,kirāya mā piṭaka,sampadaṇa [§3a], we find itihitiha (vl itih’itiha) in the Sandaka Sutta (M 76.24-26) and the Caṇki Sutta (M 95.12 f): itihitiha paramparāya piṭaka,sampadāya.36 Both iti,kira and itihitiha (and its variants) have essentially the same sense of “hearsay.” Itihitiha is formed from the base, the particle iti, and the particles –ha and –kira, both of which are used in introducing reports or anecdotal material. Itiha often occurs as a conjunction translated as “in this way” or “thinking or considering thus,” as in the Ariya,parīyesanā Sutta (M 26.19).37 Sometimes it is found in the suttas as introducing traditional history (D 1:1; M 1:151), or introducing a legendary account (M 1:311).

http://dharmafarer.org
There is the negative form anītiha or anitiha, meaning “not based on hearsay or tradition,” which is really the negative form not of itiha but of itithe. In the Brahma, cariya Sutta (A 4.25), it is said that “the Blessed One has taught a holy life not based on hearsay or tradition” (brahma, cariyam anītiham ... adesayi so bhagavā). The elder Girimānanda is said to have realized for himself “the Dharma that is anītiha” (dhammo anītiho, Tha 331). The Mettagū Māṇava Pucchā (Sn 5.5) records this statement:

(Mettagū, said the Blessed One,) I will proclaim a teaching
For the here and how, not based on hearsay or tradition,
Having known which, living mindfully, one would cross over attachment in the world.

Kittayissāmi te dhammarā (Mettagū ti bhagavā)
dīṭhe dhamme anītiham
yaṁ viditvā sato caraṁ tare loke visattikāṁ. (Sn 1053)

3 It is possible (albeit without internal evidence) that iti,kira (at least in the Buddha’s time) has the same meaning as itiha [Intro 4.3]. Its Sanskrit form aitihya probably refers to “all the Vedic branches of study from itihāsa onwards” (Jayatilleke 1963:197). The suttas, for example, always speak of “itihaśa as the fifth (item of Vedic studies)” (itihaśa, pañcamā). As such, we may surmise that this doubtworthy point—that of iti,kira—is:

directed at the validity of the legendary and historical material as well as the speculative theories of the Brāhmaṇas, Āranyakas and possibly the Early Upaniṣads, all of which were probably classified under aitihya in the Brāhmaṇical tradition at this time.” (Jayatilleke 1963:198)

4 In our own times, we can take iti,kira to refer to popular opinion or general consensus. Now that we have some idea of the ancient context and modern application of this doubtworthy point, we can “recontextualize” it by applying it to indigenous and modern legends, histories, and traditions, as well as various speculative notions (religious and otherwise). This means that we should not blindly believe the mass media, the Internet, advertisements, sales talk, evangelism, and gossips—but to take them with a grain of salt, and if possible to personally find out for oneself what the real truth is. Waking life is a series of narratives, most of which seem to have lives of their own and are not really what they appear to be. Liberation lies in the ability to see through these narratives for what they really are.

5 The argument from “hearsay” may occur like this: famous actor X appears in an advertisement as declaring that he uses product Y, or someone telling a moving story that he has found the one and only true religion Z. Hence, the subtext or hidden message (in the advertisement), or even an open declaration (by the “witness”), is that Y should be purchased or that we, too, should embrace Z. At best, we can say that X has his personal preference, or simply that he is deluded. We might as well get a famous person who says, “Eat more salt and only salt; I do and it is good for me!” Should we follow such a foolish advice?

6 Or, someone might claim that a certain view or practice must be good, right or true because it is popular or widespread (taught by the famous teacher). For example, a young Buddhist might be told by his parents to at least earn 2 academic degrees, because it is a “competitive” society, or that “everyone” is studying for double degrees. Or with 2 degrees, we could get “better” jobs, or the jobs that we want. We could then make more money, gain respect, and so on.

But do we always get the job we want, or even get a good job at all. Even if we do, after a while, we might change our minds, and look for another job. Furthermore, are people who have all the money they think they want, really happy? If they were really happy, why do they keep on wanting more? The usually way out is simply to get into denials of such considerations. On the other hand, when we are happy with what we want in life and happily go about doing it, we know just what to do, happily.

7 Such talks or arguments are valid if they are simply based on “common consensus.” There are a number of reasons that a lot of people use or buy such a soap (it is cheap, on promotion, the soap is most widely distributed, etc), or follow such a religion (people are born into it, or through social or cultural dominance, or there are palpable economic or political advantages, etc). To say that something is good, true or right because “most or many people” are using it or are “it,” is a kind of argumentation con called “consensus gentium” (common consensus).

8 A related argument con here is that of “appeal to authority” (argumentum ad verecundiam). [§3.1 (4) & comy].

§3.1 (4) “Do not go by scriptural authority” (mā piṭaka,sampadānena)

1 MEANING OF PIṬAKA

1.1 The word piṭaka literally means “basket,” and figuratively refers to the three main collections of the Pali Canon. However, this latter sense is not found in the Canon itself, but became current only around the Indian emperor Asoka’s time (that is, around two centuries after the Buddha). As used in the early suttas, the word piṭaka simply means “scripture or canon.” In other words, piṭaka is never used in the Pali Canon to refer to the Buddha’s Teaching or to itself.

1.2 The phrase piṭaka,sampadā is fully translated as “the scriptural authority,” or more simply as “scripture.” While sampadā usually means “accomplishment, proficiency” (as in sīla,sampada, paññā,sampaṭḍa), Jayatilleke notes that

the word may perhaps denote a characteristic of piṭaka (piṭakassa sampadā) and mean literally “the worth of the piṭaka” and therefore “the authority of the piṭaka.” (Jayatilleke 1963:200 §305)

We know from such discourses as the Sandaka Sutta (M 76, 24-26) and the Caṅkī Sutta (M 95, 12 f) that piṭaka,sampadā refers to the Vedic tradition. The suttas occasionally refer to the Vedic mantras or hymns having been “put together” (samihita = samihita), and the Sabhiya Sutta (Sn 3.6) refers to “the Vedas of the recluses”:

vedāni viceyya kevalāni (Sabhiyā ti bhagavā)

samaṇṇānar yāni p’atthi brāhmanānar
sabba,vedanāsu viṭa,rāgo
sabbam vedam aticca vedagu so.

Having fully examined every branch of knowledge,
(O Sabhiya, said the Blessed One:)
whatever there are of the recluses or the brahmins,
with lust removed from all feelings,
he is accomplished in all knowledge, a knowledge master.

(Sn 529)

---

40 M 76, 24-26/1:520 @ SD 35.7; M 95, 12-13/2:169 @ SD 21.15. See Jayatilleke 1963:193-199.
41 Tevijja S (D 13,13/1:238), SD 1.8; cf Skt saṁhitā, “collection.”
2 “APPEAL TO AUTHORITY”

2.1 We know that none of the sacred texts (of any religious group) were ever written down in the Buddha’s time and all teachings were orally and aurally transmitted. From such passages (Sn 529), it is also clear that the word veda (which simply means “sacred knowledge”) does not necessarily refer only to the brahminical texts, but to any religious teacher’s or group’s aural (“heard”) collection of gnostic teachings. As such, we can conclude that pitaka as a doubtfworthy source of knowledge refers to the scripture and teachings of either Vedic or non-Vedic teachers or systems, or to any religious scripture of the time, including that of Buddhism.

2.2 In our own times, we can, for example, argue that Buddhism (or any religion) is good, right or true (we are often not certain which!) because a popular movie actor or a famous scientist is “Buddhist” (of course, what kind of Buddhist is another matter). This argumentation con is common in politics, too. Politicians often try to get the endorsement of certain large or influential religious groups, so that (amongst other things), this would make more people think that those endorsed make better or the best candidates.

2.3 On a simpler level, such an argument may go this way: first, someone is praised, then that person is cited as an authority in a field unrelated to the area in which the person has been praised. It’s like saying:

A is popular in the movies (or is a famous scientist).
A is a Buddhist (or a follower of any religion).
Therefore, Buddhism (or the religion mentioned) must be true, good, or right. x

2.4 In logical terms, this basis for doubt—like the 9th and the 10th bases for doubt [§3.1]—are all examples of an “appeal to authority” (ad verecundiam, “out of deference”). 42 Here, the argumentation con is that since the words of holy scriptures say such and such position must be true. We need to carefully examine the context of the scriptural references, and the various meanings and connotations of such readings.

2.5 A related argumentation con is when we declare or assume that soap A is widely used (or religion A is widely accepted); therefore, it must be good, true or right. This is not a valid argument because there are a number of reasons that people buy such a soap (it is cheap, on promotion, the soap is most widely distributed, etc), or follow such a religion (people are born into it, or through social or cultural dominance, or they get palpable economic or political advantages, etc). This kind of argumentation is called “consensus gentium” (common consensus). [§3.1 (3) & comy]

3 PURPOSE OF THE DHARMA

3.1 In Buddhism, the Dharma is often referred to as a “path” (magga), which means that one has to walk on it towards a destination. In other words, the Dharma is a means of personal development and liberation. The Alagaddûpama Sutta (M 22) is an important discourse on the true purpose of religion: that the Dharma is to be properly used and not to be taken as good in itself. The Sutta contains 2 famous parables in this connection: the parables of the water-snake and of the raft.

3.2 In the parable of the water-snake, the Buddha warns against the misuse and abuse of the Dharma. “Without wisely examining the (true) purpose [or meaning] of those teachings with wisdom, they are not

Aṅguttara Nikāya 3, Tika Nipāta 2, Dutiya Paṇṇasaka 2, Mahā Vagga 5

convinced of it [they fail to see its wisdom]” [Comy 3a(8)],\textsuperscript{43} that is, they see the teachings through blind faith, or merely as an intellectual exercise, or for debating with others, or simply for showing off.

3.3 **The parable of the raft** points to the true nature of the Dharma as teaching. We make and use a raft simply to cross dangerous waters, and once we are safely on the other side, we have no more need for it. We are then reminded “to abandon even the Dharma, how much more that which is not Dharma!”\textsuperscript{44} Even the Dharma has only instrumental value: its purpose is for bringing one to nirvana, which is of intrinsic value (good in itself).\textsuperscript{45}

Just as a careless water-snake catcher, wrongly grasping it by its coils or its tail instead of its head, is killed or greatly pained by being bitten by a water-snake, even so, those who “learn the Dharma only for the sake of criticizing others and for winning debates, do not enjoy the benefits for the sake of which one learns the Dharma. Those teachings, wrongly grasped by them, bring them harm and suffering for a long time to come.”\textsuperscript{46}

4 **Religion in our time**

4.1 In our own time, there are two major categories of world religions and influential religious systems, namely, the book religions and the non-book religions, or more specifically, the word-based systems\textsuperscript{47} and the truth-based systems. Buddhism is an example of a non-book truth-based system.\textsuperscript{48} The main book religions are the Abrahamic systems: Judaism, Christianity, and Islam in their various sects and denominations, and also the Indian religions, such as Jainism, the various Hindu denominations, and Sikhism. Of the Chinese religions, Confucianism is an example of a book-centred system, although it is more of a socio-ethical philosophy.

This categorization however is not so clear cut. In the Abrahamic system, for example, we have numerous groups that, although having high regard for their traditional scripture (the Torah, the Bible or the Koran), often look up to their own religious leaders, mostly charismatic personalities, for religious interpretation and injunctions, and it is these leaders who actually rule their lives. Such groups are effectively cults insofar as themembers centre their lives around a living authority figure and often regard other systems and society at large or certain groups in an antagonistic manner.

4.2 In any case, whether the authority is based on a holy book (scripture) or on the leader’s word, the same doubtful point of “scriptural authority” applies. This is especially the case where the followers are not allowed to question such an authority, or can do so only in a limited or superficial way. Scriptures, after all, are man-made texts—edited, revised or authorized—of what is perceived or accepted as religious experience. Any

\textsuperscript{43} D 22,10/1:133 @ SD 3.13.
\textsuperscript{44} "Dhammā pi vo pahātabbā pag’eva adhammā." Comy takes dhammā here to mean "good states," ie calm and insight (samatha, vipassanā), citing Laṭutikāpama S (M 66,26-33:1:455) as teaching the abandonment of attachment to calm, and Mahā Taṅhā, saṅkhaya S (M 38,14/1:260 f @ SD 7.10) as one of the abandonment of attachment to insight. Bodhi, however, is of the view that “dhamma here signifies not good states themselves, but the teachings, the correct attitude to which was delineated just above in the simile of the snake.” (M:_NB 1209 n255). See Intro.
\textsuperscript{45} "Ratha,vinīta S (M 24) is a dialogue between Puṇṇa Mantāni,putta and Sāriputta on the true purpose of the Dharma in the spirit of the raft parable and discussing it in greater detail.
\textsuperscript{46} D 22,10/1:133 f @ SD 3.13. Comy explains that this passage aims at showing the fault in merely gaining intellectual knowledge of the Dharma (as in Ariṣṭha’s case). The “good for sake of which one learns the Dharma” is the paths and fruits. (MA 2:106)
\textsuperscript{47} Just as the Vedic brahmins believe that śabda (the revealed word) is preserved in the Vedas, Christians often believe that logos (God as word) is preserved literally in the Bible. Both śabda (a post-Buddhist Mimāṃsā Skt term) and logos (Gk) tr as “word.” Buddhism, on the other hand, seeks direct experience of truth (sacca, related to the word “such”) and reality (tathā, related to the word “that”): informed Buddhist practioners are thus concerned with “suchness” and “thatness,” or more simply, with the “truly real” (yathā, bhūta) or true reality (not virtual reality).
\textsuperscript{48} See SD 17.6(2.1).

http://dharmafarer.org
scripture, aural or scribal, spoken or written, that is to be understood has to be interpreted and reinterpreted, and often enough, parts of it would be ignored, misunderstood or even forgotten. Charismatic religious figures are often those who selectively quote or spin their scripture for personal ends. We therefore need to go beyond the wood of the letter to see the tree of the spirit. This only comes from a direct experience of reality: if we are hungry, we need to take the meal ourselves.

§3.1 (5) “Do not go by pure reason” (mā takka,hetu,gāhena)

1 Takka is sometimes translated as “logic,” but I think it is more closely related to naya (the following doubtfulworthy point, that of “inference”). The Buddha’s admonition mā takka,hetu, means that pure reason should not be taken to be fully reliable as a source of knowledge. Pure reason is theoretical or discursive speculation (such as, using logic alone or invoking causality), as opposed to practical reason (understanding the nature of conditionality), that is, careful thinking for the sake of happiness here and hereafter, and as a means to spiritual liberation.

2 In the Sandaka Sutta (M 76), Ānanda speaks of 4 types of religions that are not necessarily false but are unsatisfactory (anassāsika). Such a teaching has 4 possibilities:

<table>
<thead>
<tr>
<th>Reasoning</th>
<th>Truth</th>
<th>(sutakkitaṁ tathā)</th>
<th>(dutakkitaṁ tathā)</th>
</tr>
</thead>
<tbody>
<tr>
<td>well reasoned</td>
<td>true</td>
<td>(sutakkitaṁ aṇñathā)</td>
<td></td>
</tr>
<tr>
<td>well reasoned</td>
<td>false</td>
<td>(dutakkitaṁ aṇñathā)</td>
<td></td>
</tr>
<tr>
<td>ill reasoned</td>
<td>true</td>
<td>(dutakkitaṁ tathā)</td>
<td></td>
</tr>
<tr>
<td>ill reasoned</td>
<td>false</td>
<td>(dutakkitaṁ aṇñathā)</td>
<td></td>
</tr>
</tbody>
</table>

This means that the truth or falsity of an idea or teaching cannot be judged by the consistency of its reasoning alone. For, even a well reasoned idea may be false in the light of related facts, and an ill reasoned idea may be true from personal experience. Just as an idea accepted on the best authority may well be false [Comy 3a(1)], the soundness of reasoning is no guarantee of truth. Further investigation and direct knowledge are needed.

3 In the suttas, takka has two senses, which according to Jayatilleke are as follows:

   (1) the kind of reasoning with which the theories, which were debated at this time, were defended or criticized, even if they may not have been in origin products of reasoning at all, or
   (2) the kind of reasoning with which the speculative, rational metaphysical theories were constructed and which the commentator has called “pure reasoning.”

   (1963:271 f)

In simple terms, we can call the first “critical reasoning” or “practical reasoning,” and the second “speculative reasoning” or “pure reasoning.” Both may have a rational basis, but while the former is practical, the latter tends to be speculative. The Buddha often applies the former, but clearly rejects the latter.

---

49 As Bodhi does (2005:89).
50 By “causality” here is the notion of attributing events to a single cause, even a first cause, and confounding causality and correlation, eg if I were to say that there is “something” (eg this world), therefore someone (God) must have created, I have confused a correlation (which I have projected) with causation [SD 35.1 (3.6)]. By “conditionality,” is meant that no event has a single cause or effect: reality works with numerous causes and effects, although we can, by way of expedience, examine a single link between a cause and an effect, as in dependent arising: see Dependent arising, SD 5.16. See also Reflection “Causes and conditions,” R305, Singapore, 2013.
51 See Sandaka S (M 76), SD 35.7 (3.1.3); also Jayatilleke 1963:271 f.
52 For detailed discussion, see Jayatilleke 1963:205 f, 271-276.
4 Pure reason (or “pure reasoning,” according to Jayatilleke), being theoretical, discursive and speculative, has, as a rule, no interest in or actually rejects spiritual inquiry, either because their proponents lack the tools for introspection or they simply have more mundane motives. Where pure reason is common (such as in scientific, economic or political thinking), the purpose is usually to work out some sort of universal system, to find some sort of global principle governing the universe, society or the country. As such, pure reason usually involves the “power mode” [Intro 3.3].

5 On a psychological level, “pure reason(ing)” is simply another term for mental proliferation (papañca), the latent tendency or habitual impulse, as a result of lust, ill will, and ignorance, to conceptualize and speculate about one’s sense-experiences. As a modern western Buddhist puts it: “If humanity is suffering then pure reason is a symptom of this suffering not the means to its alleviation.” (Nagapiya, nd: 7). Buddhism, however, is not against reasoning in its critical form: in fact, it can be helpful in discerning good and bad, and choosing good and avoiding bad.

The point here is that the spiritually inclined mind might spontaneously be able to see the true nature of reality that lies beyond the realm of thought [reasoning] (atakkāvacara). Throughout the Brahma, jāla Sutta (D 1) we find this stock passage at the start of the Sutta and in the 13 refrains following each of the 8 main standpoints (or sets) of 62 grounds for wrong views:

There are, bhikshus, other dharmas, deep, difficult to see, difficult to understand, peaceful and sublime, beyond the sphere of reasoning, subtle, to be known by the wise, that the Tathagata, having realized for himself with direct knowledge, expounds to others—those who, rightly praising the Tathagata according to reality, would speak regarding these.

(D 1,28)55

It is because the Buddha’s wisdom is direct, total, and profound, going “beyond the sphere of reasoning,” that he is able to discern and explain all the 62 grounds for wrong views, the roots of human speculation.

Practical reason, on the other hand, aims at spiritual inquiry and is a more personal effort at self-understanding, even self-liberation. The practical reasoner, certainly in the Buddhist context, seeks to work out mental and social environments that conduce to personal development and the general good. Such an endeavour can of course serve one in the quest for self-awareness.

6 Points (5) and (6) seem to overlap. Possibly, (5) refers to a theoretical use of logic, a kind of personal reasoning without any real experience; whereas (6) refers to actually dealing with conditions and situations, and reasoning them out, we come to a logical conclusion. This possibility should be kept in mind as we go through the discussions on point (6), which follows.

§3.1 (6) “Do not go by inference (and deduction)” (mā naya,hetu[,gāhena])

1 Inference as naya

1.1 In non-Buddhist systems, such as Trairāśika Ājīvikas and the Jains, the term naya, in the technical sense of “standpoint,” is a usage not found in the Pali Canon (Jayatilleke 1963: 273). Jayatilleke distinguishes between

53 As a modern Buddhist puts it: “If humanity is suffering then pure reason is a symptom of this suffering not the means to its alleviation.” (Nagapiya, nd: 7)
54 See Mahā'padāna S (D 14,3.1.2), SD 49.8.
55 D 1,28/1:12, 1,52/1:22, 1,60/1:24, 1,66/1:28, 1,70/1:29, 1,73/1:30 (summary), 1,77/3:1:31, 1,80/3:1:32, 1,83/3:1:31, 1,92/2:1:36, 1,99/3:1:38, 1,100/3:1:39, 1,104/1:39 @ SD 25.2.
two kinds of inference: the inference without causation and the inference with causation. The former kind of inference (without causation) is that of the non-Buddhist teachers and traditions. The Vedic conception of order in the universe, for example, was not a causal one, but based on primitive animistic beliefs. The universe was ruled by rta, the course of things ruled by the god Varuṇa.

1.2 In the Buddhist context, naya, or more fully nayay,hetu, has to do with proper logical reasoning by way of cause and effect. In the Dāri,mukha Jātaka (J 378), for example, naya is used for “right inference”: “the wise one makes a right inference” (nayam nayati medhavī, J 4:241) as opposed to anaya, “wrong inference”: “the foolish makes a wrong inference” (anayam nayati dummedho).

2 Inference as anvaya

2.1 The Critical Pāli Dictionary (CPD) gives these meanings of anvaya: (1) series, lineage, succession; (2) successor, next, following; (3) ifc: following, descended from, dependent on; (4) (logical) connection, reasoning, inference, conclusion, consequence; (5) “positive concomitance.” This word is famously found in the term dhamman’anvaya, by which Sāriputta, in the Sāṃpādāniyā Sutta (D 28), makes his lion-roar that the Buddha is “the best Buddha.” I have rendered it as “the drift of the Dharma,” or alternately, “by means of the Dharma,” that is, by inference through the Dharma.

Elsewhere, dhamman’anvaya is found in the Nāṇa Vatthu Sutta 1 (S 12.33) as “inferential knowledge” (anvaye nāṇam), which by way of retrospection (recollection of past lives) enables him to deduce the qualities of past Buddhas and infer the qualities of future Buddhas. Sāriputta means that his lion-roar is based on right inference (anvaya) through his understanding and realization of the Dharma as an arhat.

2.2 The Buddhist notion of inference (termed anvaya) is closely related to dependent arising. Inference can, in fact, be used in a positive way to enter the path of saṁthood, that is, by way of “the knowledge of phenomena” (dhamme nāṇa) and “inferential knowledge” (anvaye nāṇa). Both these terms are found in the Sāṅgīti Sutta (D 33), the Nāṇa Vatthu Sutta 1 (S 12.33) and the Vībhāṅga (Vbh §796/329). The Nāṇa Vatthu Sutta 1 illustrates how inference (naya) is done so as to bring spiritual growth and realization, thus:

Bhikshus, when a noble disciple
thus understands decay-and-death (jarā, maraṇa),
thus understands the arising of decay-and-death;
thus understands the ending of decay-and-death;
thus understands the way to the ending of decay-and-death.
—This is the knowledge of phenomena (dhamme nāṇa).

---

58 See S Radhakrishnan, Indian Philosophy vol 1 1941:78 f.
61 Here I follow the tr of PED 338b & Walshe, and guided by Comys which gloss anvaya as anumāṇa (inference) (DA 3:880, MA 3:352, SA 3:210).
62 S 12.33/2:58 @ SD 35.11.
63 Cf SA 2:53 (on Upanisā S, S 12.23.4/2:30 @ SD 6.12) we can deduce dhamma’anvaya to be “review knowledge” (paccavekkhanā nāṇa), by which the arhat confirms his awakening.
64 D 33.1.11(11)/3:226.
65 S 12.33/2:58 @ SD 35.11.
66 S:8 571 tr as “the knowledge of the principle.”
By means of this principle (dhāmma) that is seen, known, immediately won, fathomed, he applies the method to the past and to the future thus:

“Whatever recluses or brahmins in the past
who directly knew decay-and-death,
who directly know the arising of decay-and-death,
who directly know the ending of decay-and-death,
who directly know the path to the ending of decay-and-death,
knew it in the very same way just as I do now.

Whatever recluses or brahmins in the future
who will directly know decay-and-death,
who will directly know the arising of decay-and-death,
who will directly know he ending of decay-and-death,
who will directly know the path to the ending of decay-and-death,
will know it in the very same way just as I do now.”

—This is “the inferential knowledge” (anvaye ṉāṇa).67 (S 12.33,17-20/2:57 f), SD 35.11

2.3 Bodhi points out68 the significance of the key phrase of the Ṛṇa Vatthu Sutta 1 here, “seen, understood, immediately attained, fathomed” (in connection with “a noble disciple”) [2.2], corresponds almost exactly to the terms used in the stock description of one who has “the Dharma eye” (dhāmma, cakkhu): “seen the Dharma, understood the Dharma, fathomed the Dharma,” thus:

“a noble disciple”: diṭṭhena viditena akālikena pattena pariyojāḥena;69
“one with Dharma-eye”: diṭṭha,dhammo pattena,dhammo ṃidita,dhammo pariyojāḥa,dhammo.70

“This implies,” concludes Bodhi, “that the Dhamma which the stream-enterer has seen is dependent origination, an inference additionally confirmed by the closing passage of the present sutta [the Ṛṇa Vatthu Sutta 1].”71 (S:B 754 n103; emphasis added.)

2.4 It is often misconceived that the direct knowledge of dependent arising is the unique quality of an arhat. However, this direct knowledge is already won by the streamwinner, that is, when one attains “penetration into the Dharma” (dhammābhīsamaya). The arya’s knowledge of dependent arising, as mentioned above, has 2 aspects:72

(1) knowledge of phenomena (dhāmme ṉāṇa), that is, the direct perception of the relationships of each pair of factors of dependent arising in the present; and
(2) inferential knowledge (anvaye ṉāṇa) of this fixed order of phenomena that has occurred in the past and will occur in the future.

2.5 From the 2 discourses, Ṛṇa Vatthu Suttas 1-2 (S 12.33-34),73 we know that anyone who comprehends dependent arising, does so in just the same way as an arya (noble saint) does, albeit only in a theoretical way. However, when one gains this knowledge as a streamwinner, one is totally assured of the final goal: this is also

67 Jayatilleke tr it as “inductive knowledge” (1963:443).
68 S:B 754 n103.

http://dharmafarer.org
2.6 The closing paragraph of the Paccaya Sutta (S 12.27) runs thus:

Bhikshus, when a noble disciple thus understands the condition (paccaya),
also understands the arising of the condition;
also understands the ending of the condition;
also understands the way to the ending of the condition,
he is then called a noble disciple, accomplished in view,
accomplished in vision,
who has arrived at this Sublime Dharma,
who sees this Sublime Dharma,
who is accomplished in the learner’s knowledge,
who is accomplished in the learner’s true knowledge,
who has entered the Dharma stream,
a noble one with penetrative wisdom,
who stands right before the door to the Deathless.

(S 12.27/2:43. Cf S 12.28/2:45; S 12.49/2:78; S 12.50/2:79)

Now let us come down to earth again to examine the conventional understanding and usage of naya, hetu or inference, and logical reasoning.

3 Deduction and Induction

3.1 Terminology

3.1.1 Deduction

In modern philosophy, there are two forms of reasoning: deduction and induction (or, deductive logic or deductive inference, and inductive logic or inductive inference, respectively).

Deduction, in daily application, often refers to observing things which few others observe, and drawing important and surprising conclusions from those observations. This is the kind of “deductive powers” that the fictitious detective Sherlock Holmes often refers to.

79 “The condition” (paccaya), that is, each pair of links of dependent arising: this is the Paccaya S (S 12.27/2:43) theme; the other themes are as follows: Bhikkhu S (S 12.28/2:45): dependent arising (fourfold truth template); Ariya, sāvaka S 1-2 (S 12.49-50/2:78 f): “the world” (loka).

80 However, most of Holmes’ “deductions” in fact use inductive or abductive reasoning; very few are actually deductive in nature. There is nearly always some conceivable, even unlikely, way that his conclusions could have been wrong, a fact often parodied. Abduction is a syllogism (set of statements) in which the major premise is evident, but the minor premise, and therefore the conclusion only probable. It is a reasoning process that starts from a set of facts and derives their most likely explanations, which is common in hypothetical work in science and computing (where it is colloquially

http://dharmafarer.org
In philosophy, deduction is used in a different sense. It is a valid argument in which it is impossible to assert the premises and to deny the conclusion without contradicting oneself. In this kind of reasoning, the conclusion is logically necessitated by, or reached from, previously known facts (the premises). If the premises are true, the conclusion must be true.

If a philosopher claims to have deduced conclusion r from premises p and q,
he is saying that he has inferred r from p and q;
he is claiming that p and q imply r (ie, he is claiming that, if someone affirmed both p and q, but denied r, that person would be asserting a self-contradiction).

Valid deduction: (1) All men are mortal. (2) The Buddha is a man. (3) Therefore, the Buddha is mortal.

Deductive reasoning may also be defined as an inference in which the conclusion is of no greater generality than the premise, or inference in which the conclusion is just as certain as the es. In simple terms, the conclusion is a specific case, one example of what is stated by the premise. It is important to note, however, that even if the deductive reasoning is logically correct, it may not always factually true, that is, it conflicts with our knowledge of the world or reality, for example:

If it is raining then the ground is dry. ×
It is raining.
Therefore the ground is dry.

3.1.2 VALIDITY AND TRUTH
At this point, we need to distinguish validity from truth. In a valid argument (using deductive reasoning), the need not be true. Deductive reasoning only requires that the conclusion follows logically from the premises. If the premises (or propositions) are true, then the conclusion must be true. Take this example (from Hospers 1967: 129)

All cows are green. ×
I am a cow. ×
Therefore, I am green. ×

Both the premises here are false, yet the conclusion is valid. As such, warns Hospers, it is important not to confuse validity with truth. Propositions are true or false; reasoning or argument is valid or invalid. The propositions in a valid argument may all be false, and the statements in an invalid argument may all be true. Deductive logic is the study of validity, not truth.

To know the truth, then, says Hospers, that a conclusion is true,
(1) we need to know that the premises are true, and
(2) the argument must be valid, that is, that the conclusion follows logically from the premises.

(1967:129)

referred to as an “inference to the best explanation”). Where an abduction is highly improbable, it is called an apagoge (“unaccountable”), sometimes known as reductio ad absurdum (Lat, “a reduction to absurdity”): eg, (1) When it rains the ground becomes wet. (Major premise). (2) The ground is wet (minor premise). (3) Therefore, it has rained (a conclusion that is only probable because the river, for example, could have overflowed onto the ground).
3.1.3 **Inference in Western Philosophy**

3.1.3.1 In Western philosophy, *inference* simply means “the drawing of a conclusion,” whether valid (reasonable) or invalid (unreasonable). For example, Hooke’s law\(^{81}\) is *the rule that gives the elongation of a beam (an effect) when a force (the cause) is acting on a beam.*

- If the force and Hooke’s law are known, the elongation of the beam can be **deduced**.
- If the elongation and Hooke’s law are known, the force acting on the beam can be **abducted**.
- If the elongation and the force are known, Hooke’s law can be **inducted**.

Simply, inference is the act or process of deriving a conclusion based solely on what one already knows or believes.

There are 3 **types of inference**, thus:\(^{82}\)

- **Deductive inference**: from the cause and the rule, one finds the effect
- **Abductive inference**: from the rule and the effect, one finds the cause
- **Inductive inference**: from the cause and the effect, one finds the rule.

3.1.3.2 **Induction** or inductive reasoning, as such, is not a clear term, sometimes referring to reasoning other than the deductive, or, otherwise, it is a method of reasoning by which a general law or principle is inferred from observed particular instances.\(^{83}\) In an argument in which the premises are true, then, it is probable that the conclusion will also be true.

The conclusion therefore does not follow with logical necessity from the premises, but rather with probability. For example, *every time we measure the speed of light in a vacuum, it is \(3 \times 10^5\) miles a second. Therefore, the speed of light in a vacuum is a universal constant.* Inductive reasoning usually proceeds from specific instances to the general.\(^{84}\)

3.1.3.3 In simple terms, induction, as we have seen above, tries, working backwards, to find the rule (a truth) by inferring from the cause and effect.\(^{85}\)

Induction often entails belief in a statement (that it is “true”), so that the conclusion is **valid**. Take this notorious argument as an example:

\[
\begin{align*}
\text{I believe in God.} & \quad \checkmark \\
\text{I am saved.} & \quad \times \\
\text{Therefore those who believe in God are saved.} & \quad \times
\end{align*}
\]

---

\(^{81}\) In physics, Hooke’s law of elasticity states that if a force (F) is applied to an elastic spring or prismatic rod (with length L and cross-section A), its extension is linearly proportional to its tensile stress \(\sigma\) and modulus of elasticity (E). The law assumes perfectly elastic behavior. It is named after the 17th century English physicist Robert Hooke (1635-1703). For a technical explanation, see [http://ccrma.stanford.edu/~jos/pasp/Hooke_s_Law.html](http://ccrma.stanford.edu/~jos/pasp/Hooke_s_Law.html).

\(^{82}\) Simply, the rule is the first premise, the cause is the second premise, and the effect the third premise (conclusion).

\(^{83}\) It is sometimes taught that deductive reasoning proceeds from the general to the particular, while inductive reasoning proceeds from the particular to the general. This is false—at least, this is not the way logicians use these terms. There are deductively valid arguments that proceed from the particular to the general (Raymond is happy, therefore someone is happy) and inductive arguments that proceed from the general to the particular (the natives of India are called Indians, therefore this Indian person is a native of India).

\(^{84}\) A Almossawi, *Bad Arguments*, 2013:9.

\(^{85}\) On the technical terms ( tts ) used in this section, see eg AW Sparkes, *Talking Philosophy*, 1991, index.
The first premise is clearly a belief and the second premise an opinion. The argument is valid but the conclusion is false [3.1.2]. Here again, we may relate one idea to another, but one idea need not bring about the other. In other words, correlation is not causal condition.

3.1.3.4 In ordinary speech, “infer” often functions as a synonym of “imply,” as in “My holy book says that if you are a nonbeliever, you will not be saved.” Careful philosophical thinking avoids this kind of usage. Implication is a relation between statements, but inference is not. Here again, we see a belief being used as a premise to draw a conclusion, an invalid one.

J S Mill, in his polemical study, An Examination of Sir William Hamilton’s Philosophy (1865: ch 14), proposes that reasoning is a source from which we derive new truths. This is a useful proposal so long as we remember that not all reasoning is inference. So long as the reasoning is valid and true, new truths may be derived—and they should also be good and useful.

3.1.4 Wrong ideas about karma

3.1.4.1 The Mahā Kamma, vibhaṅga Sutta (M 136) gives valuable insight into the nature of wrong inference or, more exactly, wrong inductive inference, resulting in wrong views of karma. The Buddha tells Ānanda how someone good in meditation, having attained clairvoyance (“the divine eye”), has the following (mis)perceptions resulting in these improper (generally wrong) views:

In the Sutta itself, there are 2 more identical remarks for each of these 4 views, that is, in each case the meditator further (a) declares that those who know thus are right, but those who know otherwise are wrong (which the Buddha rejects), and (b) “only this is true, all else is false” (which the Buddha rejects, too). The Buddha goes on to explain why he rejects most of them, approving only two of them:

In the case of (1),
(a) either he has earlier on [in a previous life] done a bad deed that results in painful feelings;
(b) or, later on [in this life] he has done a bad deed that results in painful feelings;
(c) or, at the time of death he has undertaken and established a wrong view.

As such, after death, ...
he re-appears in a plane of misery, a bad destination, a lower realm, in hell.

86 Mill vehemently opposed the “intuitionist” philosophy of William Whewell and Sir William Hamilton, who held that our understanding was based on intuitively compelling principles rather than on general, causal laws, and that ultimately we need to understand the universe as a divine creation dictated by a rational deity. Mill’s attack on this philosophy reached vengeful height in his Examination of Sir William Hamilton’s Philosophy, which provoked vigorous controversy for some two decades, but is now the least readable of Mill’s works.

87 For technical details, see The Cambridge Dictionary of Philosophy (2nd ed) 1995: Inference.

88 M 136,17/3:214 @ SD 4.16.

89 These are the 3 kinds of karma classified according to time of taking effect. See (Kamma) Nidāna S (A 3.33/1:134-136), SD 4.14, on the causes and kinds of karma; cf Nibbedhika,pariyāya S (A 6.63.12c), SD 6.11. See also Visuddhi,magga where these 3 types of karma are respectively named as dittha,dhamma vedaniya kamma, upapajja,vedaniya kamma and aparā,pariyāya vedaniya kamma—and a 4th, ahosi kamma, lapsed or ineffectual karma (Vism 19.14/601); Vism:Ñ 19.14/696 n2. The first 2 kinds of karma may not have results if the conditions needed for their ripening are missing, or because of the presence of a stronger counteractive karma; as such, they are called ahosi,kamma: cf Loṇa,phala S (A 3.99), SD 3.5. The next birth actually depends on the dying person’s last thought-moment. As such, one’s dying thoughts should be to recollect or reflect on the good deeds one has done: giving, moral virtue, lovingkindness, etc. The Mahā Rāhulovāda S (M 62 @ SD 3.11) closes with the remark that for one who develops and often cultivates the Breath Meditation, “even the last breath leaves with your knowledge, not without it” (M 62,30/1:426)—that is, one dies mindfully with right view. See Vism 8.24/291 f. On academic attempts to show that orig there are only 2 kinds of karma (present and future), and its rebuttal, see Analayo 2005 at M 3:214. See also prec n.

\end{tabular}

\footnote{90} Deva,datta, for example, persuaded prince Ajātasattu to murder his own father, Bimbisāra (a streamwinner) (DA 1:135-137), and thrice attempted to murder the Buddha himself and once succeeded in wounding him, and caused a schism in the order (V 2:191-198)—these last two deeds are certain to lead to rebirth in hell. On Devadatta, see Piya Tan, \textit{The Buddha and His Disciples} lecture 7: “The Buddha’s Bad Karma” (2002) §§5-14.

\footnote{91} M 136,18/3:214 @ SD 4.16.

\footnote{92} A good example here is that of the public executioner, Tamba,dāṭha Cora,ghātaka (DhA 8.1), or Copper tooth, who after a bloody career as a bandit, killed his own comrades and then became executioner of criminals for fifty years. He met the venerable Sāriputta whose teachings uplifted his mind, lightening the burden of his bad karma so that he attained heavenly rebirth (DhA 8.1/2:202 ff).

\footnote{93} M 136,19/3:214 f (SD 4.16).

\footnote{94} An example here is that of rajah Pasenadi of Kosala. The Anāgata,vaṁsa says that he is a Bodhisattva and will become the 4th future Buddha (JPTS 1886:37). On Pasenadi, see Piya Tan, \textit{The Buddha and His Disciples} lecture 8: “The Thundering Silence” (2002) §19.

\footnote{95} M 136,20/3:215 (SD 4.16).

\footnote{96} An example here is Mallikā, queen of king Pasenadi. She lived a virtuous life of giving, keeping the 8 precepts and so on. However, in a moment of indiscretion, she had sexual intercourse with a dog in the bath-house. When the king suspected this, she conjured up an elaborate lie. These acts weighed heavily on her mind to her last moments. As a result she spent seven days in Avīci hell. However, her own habitual goodness then brought her rebirth in Tusita heaven (DhA 9.6/3:119-122).

\footnote{97} “Here, some person harms life, takes the not-given, indulges in sexual misconduct, speaks false words, speaks malicious words, speaks harsh words, speaks frivolous words, is covetous, has a mind of ill will, holds wrong view.” These are the 10 unwholesome course of action (akusala kamma,patha) (D 33,3.2(3)/3:269, 290; A 10.176,3-6/5:264-266).
3.1.4.2 From all this, it shows that logic and reasoning, even when based on “evidence” (meaning what are palpable and measurable by way of the physical senses) are not always satisfactory as sources of knowledge, especially “final knowledge” (aṇṇā). In most religious systems, however, there are more speculation and wishful thinking than logical reasoning, so that the situation is even more problematic.

3.2 Problems with Creator-God idea.

3.2.1 In the section on eternalism (sassata,vāda) of the Brahma,jāla Sutta (D 1,28-34), the Buddha explains—as the first 4 grounds for wrong view—how some accomplished meditators who are eternalists, on 4 grounds, proclaim—through wrong inductive inference—the self and the world to be eternal, thus:

| (3) He “sees” a person, moral in every way, reborn in a heaven. | (3.1) There is good karma. [✓] (3.2) All who are moral go to heaven. [✗] |
| (4) He “sees” a person, moral in every way, reborn in a suffering state. | (4.1) There is no good karma. [✗] (4.2) All who are moral go to hell. [✗] |

Table 3.1 Possible conclusions regarding karma (M 136,9-16/3:210-214), SD 4.16

3.2.2 The Brahma,jāla Sutta (D 1), in its section on partial-eternalism (ekacca,sassata,vāda), gives another interesting example of wrong inductive inference in its explanation of how the Creator-God idea arose (that is, the 5th ground for wrong view). When the universe collapses (or devolves), beings here are mostly born in the Ābhassara [streaming-radiance] Brahmā world. When the universe re-evolves, the first being to re-arise (on account of his immense good karma) is Mahā Brahmā. Then, says the Sutta, “as a result of dwelling there all alone for so long, unrest, discontent and agitation arise in him, thus: ‘O that other beings might come here, too!’”

89 “Here, some person refrains from harming life, refrains from taking the not-given, refrains from indulging in sexual misconduct, refrains from speaking false words, refrains from speaking malicious words, refrains from speaking harsh words, refrains from speaking frivolous words, is without covetousness, has a mind without ill will, holds right view.” These are the tenfold wholesome course of action (kusala kamma,patha) (D 33,3.2(3)/3:269, 34,2.3(5)/3:290; A 10.176,7-10/5:266-268).

90 See Sandaka S (M 76), SD 35.7(3.1.3).

100 Ćukkī, ie reasoners and logicians. See foll n.

101 Vimaṇissi, those who examine and investigate. Both the terms “rationalist” and “investigator” clearly refer to the academician, philosopher or scientist of our times. Here takki hoti vimaṇissi may be taken as either a dvandva (a reasoner and an investigator) or as tatpurusha (a reasoner and investigator, ie one who investigates through reasoning). In fact, takki,vimaṇissi may be taken as syn with ākāra,parivitakka (“rational investigation” or “investigative reasoning”). This is one of the 5 courses of knowledge, viz, faith (saddhā), approval (ruci), aural/oral tradition (anussava), investigative reasoning (ākāra,parivitakka), and reflective acceptance of a view (diṭṭhi,nijjhāna-k, khanti) (M 95,14/2:170, 101,11/2:218, 102,15/1:234).

102 “[U]nrest, discontent, agitation arises,” nibbussitattā [Be nivusitattā] anabhiri-paritassanā uppajjati. These 3 abstract nn are taken as a cpd; hence, their common verb is sg.

103 This is an agitation arising on account of craving (tanhā, tasanā): see 3.41.

http://dharmafarer.org
Just then, other beings whose good karma have ripened, are reborn in the same universe, which leads Mahā Brahmā to infer that he has created them, since at his fiat, as it were, they have arisen. And these beings, too, noticing that Mahā Brahmā has arisen before them, surmise that he must have created them, proclaiming, “He must be Brahmā, the Great Brahmā, the Conqueror, the Unconquered, the Omniscient, the Omnipotent, the Lord God, the Maker, the Creator, the Chief, the Ordainer, the Almighty, the Father of all that are and that will be. By this Lord Brahmā, have we been created.” The Sutta continues:

Now, bhikshus, there is the case that a certain being, having fallen from that realm, comes here. Having come to this world, he goes forth from the home life into homelessness. When he has gone forth into homelessness, by means of exertion, by means of striving, by means of devotion, by means of diligence, by means of right attention, he touches [attains] mental concentration, such that he recollects that past life, but recollects not what is before that. He says thus:

‘We are created by Lord Brahmā, the Great Brahmā, the Conqueror, the Omniscient, the Omnipotent, the Lord God, the Maker, the Creator, the Chief, the Ordainer, the Almighty, the Father of all that are and that will be. He is permanent, stable, eternal, not subject to change: he will remain so just as eternity itself. But we have been created by that Lord Brahmā and have come here [to this world]. We are impermanent, unstable, short-lived, subject to dying.’

(D 1,18-19/1:18), SD 25.2

3.2.3 The tone of this account is interesting and humorous: it does not say that the Creator-God idea is false, but that it is based on false inference. No moral judgement is made on such ideas, except that they are unsatisfactory (anassāsika), that is, they provide no guarantee for spiritual liberation (simply because they are based on a false inference [Intro 5.2]. Understandably, theology (the study of God-ideas) and theodicy (rationalizing why God and suffering exist) are like attempts to force a square peg into a round hole.

4 Faith in Buddhism

4.1 Belief and faith

Because of the impossibility of the Creator-God idea, in the sense that there is no satisfactory way of proving that such a being exists, theologians like Anselm of Canterbury (1033/34-1109) understandably wrote: Neque enim quaero intelligere ut credam, sed credo ut intelligam. Nam et hoc credo, quia, nisi credo, non intelligam. (“Nor do I seek to understand that I may believe, but I believe that I may understand. For this too I believe, that unless I first believe, I shall not understand.”) The Buddhist answer is clearly more satisfactory.

---

104 Bhavāṁ.
105 Thānām kho pan’etam, bhikkhave, vijjati yam aṇāñataro satto tamhā kāyā cavitvā itthattāṁ āgacchati. That is, that Brahmā dies and is reborn on earth.
106 This was based on a saying of Augustine of Hippo (crede ut intelligas, “believe so that you may understand”) to relate faith and reason. It is often accompanied by its corollary, intellego ut credam (“I think so that I may believe”), and by Anselm’s other famous phrase fides quaerens intellectum (“faith seeking understanding”).
107 This is one version of a common joke: “Philosophy is like being in a dark room without a candle and looking for a black cat. Metaphysics is like being in a dark room without a candle and looking for a black cat that isn’t there. Theology is like being in a dark room without a candle and looking for a black cat that isn’t there, and shouting ‘I found it!’” (Based on Ellen Rosenbaum)
“Nor do I seek to believe that I may understand, but I understand that I may believe. For this too I understand, that unless I first understand, I shall not truly believe.” (Anselm, 11th century)

One of the very serious problems with theology—studies about God and God-related ideas—is that they are rooted in words and imagination. We may cleverly put words together and be deeply convinced by them, but they are merely words, words, words, reflecting our own minds and needs, not true reality. Words ultimately do not prove anything, except reflect their user’s or listener’s intentions or delusions.108

The key problem with such a theological statement, then, is that the means seems to justify the end: believe that you may understand. The point is whether such believing is worthwhile at all, unless one accepts that believing is good in itself. It is simply unsatisfactory to believe in something for which there is no workable proof whatsoever. As the saying goes, “seeing is believing.”109

4.2 Wise faith

4.2.1 In the Buddhist case, however, the ten discourses of the Okkanta Saṁyutta (ch 25) admonishes that a disciple could either simply “believe” in—have faith in—the fact of impermanence, or he could examine it with wisdom. If this is kept up wisely as one’s spiritual practice, then one is assured of the path to liberation in this life itself, if not surely at this life’s very last moment.110

4.2.2 Here, faith, like every other early Buddhist teaching, especially when conveyed through language, is always provisional, as we are reminded, for example, by the parable of the raft [Comy 3a(4)2]. The Caṇḍī Sutta (D 95), as we have seen [Comy 1.4(2)], presents a twelve-step training for the “final attainment of truth” (saccānupatti). The first step here is faith, acting as it were as a springboard to other higher qualities.

But this is not the “believe that I may understand” kind of faith, because it is actually the result of some prior personal experience (it is experiential), such as Sāriputta’s first meeting with Assaji, where the former’s faith arises in seeing the latter’s calm demeanour, or in the case of the Kālāmas themselves at the end of this Sutta [§18]. It is with this wise faith that the journey to awakening and liberation begins.

4.2.3 The point here is very simple yet universal: it is impossible to deny the fact of impermanence. But more important than that, the Buddha has found the way in which this awareness could actually lead to spiritual liberation, that is, either to accept it on faith, that is, reasoned or “rooted” faith (since it is an observable fact, rooted in reality), or after careful examination, that is, through wisdom (knowledge, not belief, based on personal experience). In short, it is wise faith, one that is based on experience that is both valid and true [3.1.3]. Buddhism is as simple and efficacious as that.111

§3.1(7) “Do not go by reasoned thought [by specious reasoning]” (mā ākāra,parivitakkena)

1 The word ākāra has two meanings: (1) “ways” (D 1:138, 139), and (2) “reason, reasoning” (M 1:320). The Sāriyutta Commentary explains ākāra,parivitakka thus: “For another, as he thinks, a certain thesis appears

---

108 On the fact that we cannot simply define anything into existence, see SD 1.8 (4.2.2.6).
109 However, for a philosophical discussion, see eg Daniel C Dennett, “Seeing is believing—or is it?” In K Akins (ed), Perception. Vancouver Studies in Cognitive Science 5; Oxford Univ Press, 1996:158-172. Download from: https://www.researchgate.net/publication/28762376_Seeing_is_Believing-Or_Is_It. See Unanswered questions, SD 40a.10 (7.2.2).
111 On how wisdom leads to wise faith, see Intro 6.
valid, and he concludes, ‘So it is,’ and accepts it by reasoned reflection (ākāra,parivitakka).” (SA 2:403). This reasoning however is simply the result of habitual tendency, not through any systematic way of thinking (unlike the previous two methods: takka,hetu and naya,hetu, which are more systematic).

2 The second meaning of ākāra is naya [1], that is, “reason,” also applies to a statement in the Vīmaṁsaka Sutta (M 47), where it is said that if others were to ask a monk for “the reasons (ākāra) or grounds (anvayā) on which he says that ‘the Blessed One is fully self-awakened ...’,” he should be able to say, “Through direct knowledge in the Dharma in their various aspects, I have here come to the conclusion regarding certain dharmas [phenomena] by way of the Dharma, that I have inspiring faith in the Teacher to be fully self-awakened.”

3 Such a belief is said to be “faith based on reason and rooted in vision” (ākāra,vati saddhā dassana,mūlikā) (loc cit), a stock passage referring to the streamwinner’s unshakable faith. This rational faith, which is both valid and true [3.1.3], arises through critical examination (vīmaṁsā) and partial verification is markedly different from the “rootless faith” (or blind belief, amūlikā saddhā, M 2:70) of the Vedic brahmins and theistic believers, and which does not bear critical examination.

By itself, such a “reasoned faith” (ākāra,vati saddhā) does not amount of liberating knowledge (añña or ṇaṇa), but with “rooted vision” (dassana,mūlika), that is, a significant level of personal experience of reality, one can claim the validity of that knowledge for that level (namely, streamwinning). Again, by itself, reasoned faith cannot be a valid source of knowledge.

4 There is a kind of reasoning or argumentation that seems reasonable, but is actually intended to persuade or mislead us into accepting what is unacceptable, into seeing as possible what is really impossible, into taking what is imaginative or virtual to be real.

Sophistry is argumentation that is specious (plausible but false) or excessively subtle and intended to mislead others. Here’s a clever sophist statement: “The unbelievable is not always the improbable; the inconceivable is not always the impossible.” This may well be true in some ideas that we have been right and good in the first place, but which we have misunderstood, but we must be guarded against freely applying this kind of reasoning to things that are really improbable and impossible.

Something similar is called casuistry, that is, argumentation that is specious (plausible but false) or excessively subtle and intended to mislead others. It is a clever use of reasoning to trick others, using arguments that sound correct but are actually false. For example, we claim that it is better to kill one big animal than to eat a lot of fish or smaller animals, which is killing more beings; or, that we cannot take our wealth with us, why not send it ahead by donating it to the temple or the monastery.

Sophistry and casuistry often overlap, as they are both dishonest and false argumentation to mislead others, and are very common in religion, which we need to avoid and to guard against. The great French philosopher, Voltaire, ominously warns us: “Those who can make you believe absurdities, can make you commit atrocities.”

113 Tathā tathā’ham tasmiṁ dhamme abhiññāya idh’ekaccaṁ dhammaṁ dhammesu niṭṭhaṁ agamaṁ satthari pasīdīṁ sammā,sambuddho bhagavā… (M 47,15-16/1:320), SD 35.6.
114 See Jayatilleke 1963:393.
115 Voltaire, alternative translation of passage from “Questions sur les miracles,” 1765.
§3.1 (8) “Do not go by acceptance of [by being convinced of] a view after pondering on it” (mā ditthi, nijjhāna-k, khantiyā)

1 The Aṅguttara Commentary explains this point as “after considering [after reflecting] and after being convinced of it because it agrees with the view that we hold” (amhāram nijjhāyitvā khamitvā gahita, ditthiyā saddhīhin sameti, AA 2:305). In other words, we believe or are convinced of something because it agrees with our preconceived notions or bias. It is as if we like the colour green, and think that whatever is green in colour is true and good. We have a fixed idea, as it were, and we simply look around, accepting only those things that agree with it, not knowing whether any of them is true and valid or not.

2 Here khamati has been rendered in strong sense as “being convinced, persuaded, receptive.” Occasionally, when khamati occurs with ditthi, it is usually translated as “approving of” or “agreeing with” some theory, such as sabbam me khamati, “all is agreeable to me” (M 1:497). In a word, we can call this our “intellectual receptivity,” in the sense of a bias, liking, or preference.

3 More broadly, we can include the notion of “political correctness” here. We hold or accept a certain view on account of a favour we have enjoyed or are enjoying, or out of fear of impending loss or pain or punishment. Political correctness, here is defined as an attitude or policy of being careful not to offend or upset any person or group in society who are at a disadvantage (such as the “visually handicapped” for the blind), or believed to put us at a disadvantage (readily agreeing to someone of a higher “status,” being a yes-man). Ironically here, we might know that we are in the wrong, but circumstances are such that we are unwilling or unable to tell the truth. However, we should be perceptive enough to notice such a response, and know it for what it really is.

4 However, when nijjhāna (Skt nidhyāna, “wisdom or understanding”) is used with khamati—as in the phrase nijjhānam khamati—it is usually translated as “to be convinced of,” or more freely, “fails to see its wisdom.” This passage, for example, appears in the Alagaddupama Sutta (M 22).

Without wisely examining the (true) purpose [or meaning] of those teachings with wisdom, they are not convinced of it [they fail to see its wisdom].

Tesaṁ te dhammā paññāya attham anupaparikkhatam na nijjhānam khamanti.
(M 22,10/1:133), SD 3.13

5 A positive usage of nijjhānam khamati is found in the Kiṭāgiri Sutta (M 70), thus:

Having heard the Dharma, he remembers [memorizes] it.
He examines the meaning of the teachings that he has remembered.

---

117 See Tha:N 267 n1029.
118 Bodhi: “Not examining the meaning of those teachings with wisdom, they do not gain a reflective acceptance of them.” “They are not convinced of its wisdom,” na nijjhānam khamanti, ie, “they see no wisdom in it.” They are not convinced because of their failure to understand that the purpose of moral conduct is to attain concentration, the purpose of concentration the attaining of insight, etc. (MṬ qu by Nyanaponika 1974:35 n10). Here nijjhāna (Skt nidhyāna) means wisdom or understanding. This phrase, preceded by “having wisely examined the purpose [and/or meaning]” appears in Kiṭāgiri S (M 70,20) and Cāṇki S (M 95,27). Cf “One for whom these teachings are accepted thus after being pondered to a sufficient degree with wisdom is called a Dhamma-follower” (S 25.1 & S:B 1099 n169).
119 This and next line: Sutvā dhammaṁ dhāreti / dhātānam dhammānam attham upaparikkhati: here dhammaṁ (sg) in the first line becomes dhammānam (pl) in the second line. In the first line, dhammaṁ refers to the Teaching as a whole; in the second line, individual aspects or topics are meant.
When he has examined their meaning, he is convinced of the teachings after pondering on it.\footnote{120} Being convinced of the teachings after pondering on it, will-power [initiative] arises in him.

Suttā dhammaṁ dhāreti,
dhatānaṁ dhammānaṁ atham uphold,
atthoṁ upaparikkhato dhammā nijjhānaṁ khamantī,
dhamma, nijjhāna, khantiyā sati chando jāyati. (M 70,23-24/1:478-480)\footnote{121} @ SD 11.1

6 The idiomatic phrase, dhammā ... khamantī (khamanti in apposition to dhammā), literally translated “the teachings are convincing.” In the above context, translating this phrase idiomatically as “he is convinced of” fits it better than “he approves of,” which sounds weaker. Furthermore, this goes well with the Aṅguttara Commentary which explains this same line as “after consideration and after being convinced of it because it agrees with the view that we hold” (amhākaṁ nijjhāyitvā khamitvā gahita, diṭṭhiyā sattati sameti, AA 2:305). So here we see that thinking and reflecting are essential aspects of spiritual growth: as such, there is a positive counterpart of this doubtworthy point, that is, “he is convinced of the Dharma after pondering on it” \footnote{122}.

§3.1 (9) Do not go by (another’s) seeming ability (mā bhavya, rūpatāya)

1 The word bhavya comes from Vbhū (to be, become) and rūpa means “having the nature of, fitting.” Jayatilleke explains that literally mā bhavya, rūpatāya would read “because of its having the nature of what ought to be,” or more freely, “because of its propriety or fittingness.” He adds:

It would mean the acceptance of a proposition on the grounds of its being specifically fitting or appropriate to a context or situation. Ethical theorists have sometimes advocated “fittingness” as a criterion of an action.\footnote{122} According to them, an action would be right if it is the appropriate or proper action in the situation. It is a notion that could be extended to the field of truth. This interpretation of bhavyarūpatāḥ though possible is unlikely, for it is too abstract a conception for the sixth century BC and for Indian thought in general, which loves the concrete rather than the abstract. (Jayatilleke 1963:200f)

2 We do however find a significant number of examples in the Suttas where bhabba (an equivalent form of bhavya) referring to those “from whom a proposition is accepted rather than to the proposition itself” (loc cit). Bhabba (ie bhavya), in the sense of “suitable or capable,” qualifies persons in such instances:

|bhabba abhinibhidāya| capable of piercing through (the egg-shell) | M 1:104=357 |
bhabba sambodhāya | capable of self-awakening | M 1:357 |
bhabba anuttarassa | capable of attaining the supreme | M 1:357 |
yogakkhemassa adhigāmāya | security from the yokes (of defilements) | M 1:357 |
bhabbā te anta, kiriyāya | capable of making an end of it | It 106 |

\footnote{120} Nijjhānaṁ khamantī, lit “insights are endured,” ie “capable of bearing insights”; idiomatic meaning “he is pleased with, approves of, finds pleasure in” (M 1:133 f; 479 f, 2:173, 175; S 3:225, 228, 5:377, 379; Vv 84.17). Khanti usu means “patience” but here it means “choice, receptivity, preference, acceptance.” The BHSD defines ksānti as “intellectual receptivity; the being ready in advance to accept knowledge.” Khanti is often used in the Canon in this latter sense (see SD 12.13(2a) for refs). The phrase can also be freely rendered as “receptivity in harmony with true reality.” On khanti as “mental receptivity,” see Aniccā S (A 6.98), SD 12.13(3). 
\footnote{121} Cf A 4:336, 5:154. See also Jayatilleke 1963:275 f.
\footnote{122} PH Nowell Smith, Ethics, Penguin, 1954:120 f, 186 f. [Jayatilleke’s fn]
3 Such usages are also supported by the Commentary, for example, *ayāṁ bhikkhu bhabba,rūpo imassa kathāṁ gahetum yuttam*, “This recluse [monk] is capable: his statement can be accepted” (AA 2:305). As such, the phrase *bhavya,rūpa* may be translated as “by another’s seeming ability (or reliability, or competence.” In fact, Jayatilleke notes, this would be in effect the same as *verbal testimony* (āptopadeśa or āptavacana) as a means of knowledge, as recognized in later Indian philosophical tradition. (loc cit)

4 In our own times, the doubtworthy point of going by another’s seeming ability would refer to uncritically accepting a view on account of the person’s *expertise* or *charisma*. As far as *expertise* is concerned, even experts do not always agree with one another, and the errors they commit tend to have more widespread and devastating effects than those of a non-expert!

5 Charisma (the attribution of familiar or attractive qualities to another) can influence one in 2 ways: firstly, emotional attachment can arise from familiarity with a person, and more deleteriously, charisma leads to psychological transference, where one transfers or displaces an emotion or affective attitude from a familiar person (say, one’s father, husband, or partner) onto the teacher or speaker. In either case, the celebrity worship could make one dysfunctional. *Lakuṇṭhaka Bhaddiya* (“the dwarf monk”), in his Thera,gāthā, warns against accepting him on charisma, thus:

469 Those people who have judged [measured] me by appearance and who follow me by voice,
   Overcome by desire and passion, they know me not.

470 The foolish one, surrounded by mental hindrances, neither knows the inside
   Nor sees the outside—he is indeed misled by voice.

471 Who knows not the inside, but sees the outside:
   Seeing only external fruits, he, too, is misled by voice.

472 Who knows the inside, and sees the outside:
   Seeing without obstructions, he is not misled by voice. (Tha 469-472 ≠ A 2:71)

6 The Thera,gāthā Commentary explains the phrase “seeing only external fruits” (*bahiddhā,phala,dassavi*) as meaning “grasping only the fruits through grasping by way of inference” (*naya-g,ghahanena phala,mattaṁ gañhanto*, ThaA 2:198). Such a person, misled by another’s external or physical qualities wrongly infers that they

---

123 However, we also have *bhabba,rūpa*, U 79.
124 The Puggala-p,paśāda S (A 5.250/3:270) warns against the dangers of being devoted to one person because, should the person (a monk) is suspended by the order, or made to sit at the edge of the assembly, or leaves for a distant place, or leaves the order, or dies, one would then not attend to other monks (or teachers), as a result of which one neglects the Dharma, and as a result one’s personal development is negatively affected. [Comy 1.4(2)]
125 Such an emotion or affective attitude can also be transferred to a God-figure, which is actually very common in God-centred religions. See Piyasilo, *Charisma in Buddhism*, 1992h.
127 “Have judged,” *pāmiṁsu*, lit “(they) measured.”
128 “Who follow me by voice,” *ye ca ghoṣenā anvagū*, alt tr “who follow me by my voice.”
entail wholesome inner qualities. Or, worse, one is simply attracted merely to another’s external or physical qualities for what they are. In either case, one’s mind is clearly dominated by lust and delusion.\textsuperscript{129}

7 In logical terms, this—like the next or 10\textsuperscript{th} basis for doubt [§3.1]—is an example of an “appeal to authority” (\textit{ad verecundiam}, “[appeal to revered authority”).\textsuperscript{130} This is an argumentation that just because someone is learned, well-qualified or charismatic, his opinion on a certain matter must be right, despite everything else. This includes accepting a personal opinion, such as from a famous teacher, as being true without examining and substantiating its veracity.

\textbf{§3.1 (10) “Do not go by the thought, ‘This recluse is our teacher.’ [‘This recluse is respected by us.’]” (\textit{mā samāno no garu tī})}

1 The sentence \textit{samāno no garu} may be rendered in 3 ways:

(1) “our (no) recluse [holy man] is a respected teacher (garu)”;  
(2) “our recluse is respected (garu)”; or  
(3) “(this) recluse is respected by us (no).”

Sentence (1) reflects partisanship or patronage, that he is \textit{our} recluse, not some other person, that one regards as one’s teacher: this could have been spoken by a monk about another. (2) is more general, and refers to any recluse, not necessarily one’s teacher, but who is generally well-respected. (3), like (1), shows a certain bias between speaker and recluse. All three interpretations reflect the person’s status, either due to charisma or as one’s teacher. In other words, “recluse” (\textit{samāna}) can refer to a monk, a nun, any holy man, or anyone teaching on religion or religion-related matters. All three interpretations point to the logical fallacy of “appeal to authority” (\textit{ad verecundiam}, “(appeal) to revered authority”).\textsuperscript{131}

2 On the whole, we can surmise that this doubtful point is against the unconditional acceptance of a statement on account of the speaker’s prestige or charisma. As such, it is similar to the previous doubtful point, point 9. However, while point 9 (\textit{mā bhavya, rūpatāya}), refers to a person’s ability or intrinsic worth, this point (10) (\textit{mā samāno no garu}) merely refers to his prestige, a point clearly discerned in the suttas. A teacher or speaker, for example, could be popular and respected but is not Dharma-centred in his teaching; or the audience is incapable of discerning good or bad qualities in him (or her).

3 In the Dhamma, \textit{kathika Sutta} (A 4.139 = Pug 4.7), the Buddha lists 4 types of Dharma speakers:

(1) one who speaks little but on what is irrelevant (\textit{asahita}) (to the spiritual development), and the audience is unskilled (\textit{akusala}) in discerning it;  
(2) one who speaks little and on what is relevant (\textit{sahita}), and the audience is skilled (\textit{kusala}) in discerning it;  
(3) one who speaks much but on what is irrelevant, and the audience is unskilled in discerning it;  
(4) one who speaks much and on what is relevant, and the audience is skilled in discerning it.

(A 4.139/2:138; Pug 4.7/42), SD 46.10

\textsuperscript{129} See \textit{The teacher or the teaching?} SD 3.14(6).  
\textsuperscript{130} See Shapiro 2011:80.  
\textsuperscript{131} See Shapiro 2011:80.
4 A classic application of this doubtworthy point is found in the Mahā Taṇhā,saṅkhaya Sutta (M 38), where it is said, “our teacher is respected; we speak out of respect for our teacher.” (satthā no garu, satthu,gāravena ca mayam vādema). As this is directly related to this point, let us look at the whole passage in context. The Buddha is admonishing the monks against Ariṭṭha’s wrong view that sexual pleasure is not against the Teaching. The Buddha explains the nature of consciousness, of the body, of food (how the body and mind are sustained), dependent arising, and not speculating about oneself. Finally, he goes on to explain the true measure of wisdom:

4 “Monks, knowing thus, seeing thus, would you speak thus:
‘The teacher [Gotama] is respected by us.’
“No, bhante.”
24.2 “Monks, knowing thus, seeing thus, would you speak thus:
‘The recluse [Gotama] says thus, and we speak thus following the word of the recluse’
“No, bhante.”
24.3 “Monks, knowing thus, seeing thus, would you turn to another teacher?”
“No, bhante.”
24.4 “Monks, knowing thus, seeing thus, would you resort to the observances [rules], strange arguments, and auspicious and portentous rites and practices of common [worldly] recluses and brahmins, taking them as the essence [the heart of the holy life]?”
“No, bhante.”
24.5 “Do you speak only of what you have known, seen and understood for yourselves?”
“Yes, bhante.”
25 “Good, monks! So have you been guided by me with this Dharma, seen here and now [to be realized in this life], timeless, for one to come and see, accessible [leading onward], to be personally known by the wise.
For it is in reference to this that it has been said:
‘Monks, this Dharma is seen here and now, timeless, for one to come and see, accessible, to be personally known by the wise.’

(M 38,24-25/1:265), SD 7.10

5 In the suttas, the word samanā (“recluse,” sometimes translated as “monk”) generally refers to those following the religious life who are now of the Vedic tradition, as in the common term, samanā,brāhmaṇa

---

132 M 38,24/1:265 @ SD 7.10.
133 This and the next sentence: satthā no garu, satthu,gāravena ca mayam vādema. “The teacher is respected by us,” satthā no garu, alt tr: “Our teacher is respected/respectable.” Comy glosses garu (“respected”) here means bhārika (”grievous, burdensome, to be followed unwillingly,” MA 2:309).
134 The two assertions here (§24.1+2) are conflated forming the last of the 10 “doubtworthy positions” (kanikkāniyā-t,thāna) of Kesaputtiya S (A 3.65), SD 35.4, where it is not regarded as a valid source of spiritual knowledge (A 3.65,- 3.2/1:189)
135 “And we speak at the instruction of the recluse,” PTS Be Se samanā ca na ca mayān; Ce (Buddha Jayanti) samaṇa,vacoṣena ca mayān. Here, Bodhi proposes that the latter is the better reading, which I follow. “The recluse” here is the Buddha.
136 “Would you resort to,” paccāgaccheyyātha, or “would you return to, fall back on.”
137 “The observances [rules], strange arguments, and auspicious and portentous rites and practices,” vata,kotūhala,- mangalāni. The word kotūhala or kutūhala here is probably confused with kolāhala, “tumult, chaos.” Kotūhala: “eagerness, excitement; curiosity; excited talk, vehement discussion.” However, as a cpd with the prefix -mangalika, the reading should be kotūhala or kutūhala, thus kotūhala,mangala (“auspicious and portentous rites and practices”) (A 3:439; J 1:373). Cf A 3:206, 439. See A:H 3:151 n4.
138 “Seen,” diṭṭhaṁ, ie seen with the eye of wisdom (paññā,cakkhu) (MA 2:309).
(“recluses and brahmins”), and samanā is often applied to the Buddha, or to recluses or religious in general. Due to the proliferation of religious teachers during the Buddha’s time, it is difficult to know who is wise and accomplished, and who foolish or false: so one has to be wisely discerning in listening to teachers and teachings.

6 Spirituality as a state, not status

6.1 The problem is more complicated today, where almost any kind of information, especially Buddhist teachings, is easily available in recorded, printed and digital forms, and practically anyone can speak for Buddhism. In the post-industrial society, where everything, including people, can be measured, status (religious titles, academic qualifications, wealth, power, charisma) become tokens of good karma, respectability and devotion.

Hence, in the spirit of the Sutta, we should not see a teacher or monastic as being proficient merely because of social status, economic success, academic qualification or charismatic personality. Instead, we should discern whether the teaching or information given is relevant and helpful for Dharma-spirited personal development. We must judiciously study such persons whether they measure up to the moral virtue and wisdom they preach. If not, we must avoid them so that we do not give them the wrong message that we accept them despite their falsity.

6.2 A basic guideline for teaching Dharma is given as follows in the Udāyi Sutta (A 5.159):

1. One should talk on Dharma in a progressive (gradually advanced) manner (ānupubbi, kathā).
2. One should speak explaining and illustrating the meaning of teachings and the goal of the Dharma (pariyāya, dassāvi).
3. One should teach out of compassion (anudayatam paticca).
4. One should teach not for worldly gain (na āmisantarato).
5. One should teach neither harming oneself nor others (attāna ca paraṇi ca anupahacca).

(A 5.159/3:184), SD 46.1

7 In the Gotamaka Cetiya Sutta (A 3.123), and again, but briefly, in the Mahā Sakul’udāyi Sutta (M 77), the Buddha explains that through his knowledge and vision, he teaches the Dharma in these 3 ways:

Bhikshus, I teach the Dharma with direct knowledge (abhiññā), not without direct knowledge.

139 V 2:295; D 1:5, 2:150; A 1:110, 173 f; It 64; Sn 189; or as opposing parties: D 1:13; It 58, 60; Sn p90; V 1:12, 2:110.
140 As samanā Gotama, very commonly found throughout the 4 Nikāyas, eg D 1:3; M 1:23; S 1:28; A 1:64; Sn p91, 99; V 1:8, 350.
141 D 1:5, 2:150, 3:16, 95 f, 130 f; S 1:45; A 1:67, 110, 173 f; Dh 184, 189; It 64; V 2:295.
142 Nagara, vindeyya S (M 150) reminds us to neither respect nor support these, esp monastics and teachers, who are still fiulled with greed, hate, delusion (SD 59.11).
143 In a capitalist money-based economy, this point needs to be carefully discerned. In principle, no fees should be charged for Dharma talks, but donations are given by way of appreciation (muditā) and merit-making (puñña). However, it is common practice that participants have to pay for attending a course or a seminar so that expenses are covered. In the case of full time lay Dharma teachers or speakers, too, in principle, there should be no charge for Dharma talks, but if necessary a fair amount could be stated as “suggested donation,” so that the audience are free to give what they can or even not at all if they are unable to.
144 For example, not exalting oneself and belittling others. (AA 3:293)
145 “Direct knowledge” (abhiññā), also called “higher knowledge,” of which there are six (cha-lābhiññā) are given in detail in Sāmañña phala S (D 2.87-98/2.77-86), SD 8.10. They are: (1) psychic manifestations (idāhi, vidhā); (2) the divine ear (dibba, sota); (3) mind-reading (para, citta, vijānanā); (4) recollection of past lives (pubbe, nivāsānussati); (5) the divine eye (dibba, cakkhu); and the most important is (6) the destruction of the influxes (āsava-k, khaya, nāṇa), ie the destruction of the

http://dharmafarer.org
Bhikshus, I teach the Dharma with proper cause and reasoning (sa, nidāna), not without proper cause and reasoning.

Bhikshus, I teach the Dharma accompanied by wonders (sappāṭiḥāriya), not without wonders. As such, bhikshus, because I teach the Dharma based on direct knowledge, not without direct knowledge ... with proper cause and reasoning, not without proper cause and reasoning ... with wonders, not without wonders, my advice should be followed (karanīya), my teaching should be followed.

And this, bhikshus, is enough for you to be content (tuṭṭhiyā), enough for you to be gratified (attamanatāyā), enough for you to be joyful (somanassāyā)—

Fully self-awakened is the Blessed One. Well-taught is the Dharma [the true teaching].

Well-conducted is the Sangha [the holy community of saints].

(A 3.123/1:276), SD 11.10

8 As clearly stated in the Vimaṃsaka Sutta (M 47), the Buddha himself invites us to examine and test him for ourselves to see if he is truly awakened and liberated [Intro 6]. We are not only to measure him by the excellence of his teachings, but also that he lives up to his teachings. This investigation can be done by way of critically studying the Buddha’s life (from the suttas) and his teaching style. If the Buddha himself invites us to examine him, it surely behooves us to investigate other teachers, especially those we choose as our own. After having known that “as they say so they do, as they do so they say” (yathā, vādī tathā, kārī, yathā, kārī tathā, vādī), we can live by their teachings, assured that they are reflective of the true Dharma, conducive to spiritual development and liberation. The rule of thumb is that a Dharma talk should be conducive to spiritual development.

9 In the (Pañcaka) Thera Sutta (A 5.88), the Buddha warns us that even when an elder monk is of long standing, well known, a recipient of generous donations, or deeply learned, “but is of wrong view and deviant vision.” Such an elder is not only wrong, but would not benefit anyone at all. The positive qualities here must also be attended by right view and non-deviant vision—he would then benefit the many, both gods and humans.149

§3.2 (1) “When you know for yourselves, Kālāmas, ...”

This whole section [§3b] is completely absent from the Chinese version [SD 35.4b]. This omission is probably due to transmission error.

The Pali text here is yadā tumhe Kālāmā attana’va jāneyyātha. The Buddha’s criterion for rejecting views and ways of knowing, as we can see, is pragmatic, but as we shall see in the following passage, it is also morally ethical. He is not concerned with philosophical ethics, but with the practical application of the moral life as a basis for further personal development. The appeal here is clearly not to faith, but to wise inference through personal experience and observation. The passage continues as follows:

146 “With proper reasoning” (sa, nidāna), ie showing cause and effect, or causality (sappaccaya) (AA 1:374).

147 That is, by way of reversing contrary (negative) qualities (paccanika, paṭiḥaranena sappāṭiḥāriyaṃ eva katvā kathemi, AA 2:374). The wonder or miracle (paṭiḥāriya) here is of course that of instruction (anussāsani, paṭiḥāriya), that is, the miracle of conversion for bad to good, as mentioned in Kejaṭṭha S (D 11.8/1:214), SD 1.7.

149 A 5.88 (SD 40a.16).

http://dharmafarer.org
§3.2 (2) “These things are unwholesome ... blamable ... censured by the wise ... fully undertaken, bring about harm and suffering.”

1 The Pali text here is ime dhammā akusalā, ime dhammā sāvajjā, ime dhammā viññū, garahitā, ime dhammā samattā samādinnā ahitāya dukkhāya saṁvattanti‘ti: atha tumhe Kālāmā pajaheyyātha. At this point, both the Buddha and the Kālāmas have agreed to a common standard of moral virtue, that is, to unwholesome nature and actions have to be rejected for the following reasons.

2 “They are blamable” (sāvajjā)

2.1 This means that their action entails a breach of the precept. This refers to moral fear (ottappa),150 that is, an other-regarding moral sense that one’s actions affect others, and as such are morally efficacious. Therefore, one is responsible for one’s karma.

2.2 “They are censured by the wise” (viññū,garahita), that is, disapproved by others, especially, such awakened beings as the Buddha and so on (Nm 2:422). This refers to moral shame (hiri),151 that is, a self-regarding moral sense, or how others would think of one (for example, that our lack of moral virtue would lead to a loss of respect from others).

2.3 “They bring about harm and suffering” (ahitāya dukkhāya saṁvattanti), or literally, “they bring about what is not useful (ahita) and what is unsatisfactory (dukkhā).” The humble word hita is very interesting: it is an adjective in the form of a past participle of the verb dahati, “he puts down, places,” as in the following examples:

mittato daheyya “would consider (him) a friend” (S 3:113);
cittam dahati “he fixes the mind (on an object)” (A 4:239); and
bālam dahanti mithu aنينha-m-aنينha “they regard one another as fools” (Sn 825).

As such, hita is often taken to mean “useful, suitable, beneficial, friendly.”152 As a neuter noun, it means “benefit, blessing, good”;153 and in later times, as a noun, it takes on the meaning of “friend, benefactor” (Mahvs 3, 37).

150 “Moral fear,” otappa. The term otappa is derived from apa + VRTAP (to be abashed) [Skt *āpatrapya > apatrapā (Trenkner)]. Andersen suggests that this etym must be preferred to that of Childers: *autappya > uttoṇa, ut + VTRAP (heat) (PG 62). Edgerton (BHSD) has apatrapya and the cpd hirī-apatrapa (P hiri,otappa). The Abhidhamma def moral shame as “to be ashamed of what one ought to be ashamed of, to be ashamed of performing bad and unwholesome deeds” (Pug 24); cf Dhs:R 18 f. It is one of the 7 noble treasures (ariya,dhanāni, DA 2:34; ThaA 240; VvA 113), ie treasures of generosity (cāga,dhanāni, D 3:163, 251; A 4:5; VvA 113; cf A 3:53): faith, moral conduct, moral shame, moral fear, learning, generosity, wisdom. Cf Sn 77, 462 (= D 1:168), 719. According to Vism, the proximate cause for moral shame is self-respect, while for moral fear it is respect for others. Out of self-respect (attāna garu katvā), one, like the daughter of a good family, rejects bad-doing through moral shame. Out of other-respect (parama garu katvā), one, like a courtisan, rejects bad-doing through moral fear (Vism 14.142/464 f). Moral shame is often paired with moral fear (ottappa) (eg M 1:271; S 2:220; A 2:78; It 34; Tikap 61; J 1:127; Vism 221; Dha 3:73), and, as the foundation for morality, called “the world-protectors” (loka,pāla, A 1:51), since they are the preconditions for a functional society. The former is sometimes known as self-regarding moral conduct (motivated by the shame the deed entails), while the latter as other-regarding moral conduct (motivated by the healthy fear of karmic repercussion). As such these two actions are known as the two bright states that protect the world, if not for which “one would neither respect one’s mother, nor one’s mother’s sister, nor one’s brother’s wife, nor one’s teacher’s wife...” (A 1:50). [In his tr, Nānāmoli renders hiri as “conscience,” but apparently mistranslates ottappati as “is ashamed” and ottappa as “shame,” Vism:Ñ 524 f.] See Hiri Ottappa S (A 2.9/1:50), SD 2.5.

151 “Moral shame,” hiri (Skt hṛi) ie, a sense of disgust with evil. See prec n.

152 D 3:211 f; A 1:58, 155 f, 2:191; Dh 163.
2.4 This third quality clearly has to do with “heedlessness” (pamāda). In fact, we find such a triad of moral shame, moral fear, and heedlessness, in the Abhābha Sutta (A 10.76):

They are lack of moral shame, lack of moral fear, and heedlessness. Without giving up these 3 things, monks, one would be unable to give up disrespect, intractability and bad friendship.

(A 10.76,20/5:146), SD 2.4

“Heedlessness” (pamāda), is wrong conduct of the three doors (the body, speech, and the mind) and being habitually subjected to the physical pleasures of the five senses (Vbh 846/350), that is, not working for one’s spiritual development.

2.5 Those under the control of the 3 unwholesome roots—greed, hate, and delusion—“overcome by greed, ... by hatred, ... by delusion, his mind controlled by it, will destroy life, take what is not given, violate the women of others, and tell lies, and he will also make others do likewise, which will bring about harm and suffering for a long time.” That is, they tend to break the five precepts [§§4-6]. But those who are not under the power of these three roots—those who cultivate the non-greed (charity), non-hate (lovingkindness) and non-delusion (wisdom)—are unlikely to break the 5 precepts [§§10-12]. Keeping well to these precepts, they are very unlikely to be reborn in subhuman realms.

3 Criteria for the true Dharma

3.1 Such an admonition is given to the Kālāmas as lay people. On a higher level, the Buddha has given various teachings as criteria for the True Teaching. Throughout the Nikāyas, such as in the Poṭṭhapāda Sutta (D 9), the Buddha declares that he does not teach those things that do not conduce to “revulsion [disillusionment],” dispassion (fading away of lust), to cessation (of suffering), to inner peace [the stilling of defilements], to direct knowledge (of the four noble truths), to awakening, to nirvana,” but he teaches the 4 noble truths because they conduce to these states.”

3.2 Similarly, when Upāli requests a “Dharma in brief” on which to reflect during his solitary retreat, the Buddha, in the Nibbidāya Sutta (A 7.79), admonishes thus:

This is what, Upāli, you should know regarding the Dharma:

“These things bring about

- total revulsion [disillusionment],
- dispassion [fading away of lust],
- cessation (of suffering),
- inner peace [the stilling of defilements],

ekanta,nibbidāya, virāgāya, nirodhāya, upasamāya

http://dharmafarer.org
direct knowledge (of the four noble truths),
awakening,
nirvana.

abhiññāya
sambodhāya
nibbānāya saṁvattanti

Of such things, you can be certain:
“This is the Dharma; this is the Vinaya [Discipline]; this is the Teacher’s Teaching.”

(A 7.79/4:143)

3.3 A more detailed version of this “Dharma in brief,” that is, a set of criteria for the True Teaching, is given by the Buddha to Mahā Pajāpatī Gotamī, on her request for a topic of reflection for her solitary retreat, as recorded in the Vinaya (Cv 10.5) and the (Gotamī) Saṅkhitta Sutta (A 8.53), thus:

This is what, Gotamī, you should know regarding the Dharma: “These things bring about dispassion, not passion (virāgāya saṁvattanti no sarāgāya);
bring about detachment, not attachment (visamyojāga saṁvattanti no samyojāya);
bring about lessening (of karma), not accumulation (apacayāya saṁvattanti no ācayāya);
bring about having fewer wishes, not many wishes (appicchatāya saṁvattanti no māhācchātāya);
bring about contentment, not discontent (santuṭṭhiyā saṁvattanti no asantuṭṭhiyā);
bring about solitude, not socializing (pavivekāya saṁvattanti no saṅganikāya);
bring about arousing of energy, not laziness (viriyārambhāya saṁvattanti no kosajjāya);
bring about frugality, not luxury (subha, ratāya saṁvattanti no dubbha, ratāya).”

Of such things, you can be certain:
“This is the Dharma; this is the Vinaya [Discipline]; this is the teacher’s teaching.”

(A 8.53/4:280 f = Cv 10.5 @ V2:258 f)

3.4 In short, false Dharma is the Buddhism of greed, the Buddhism of hate, and the Buddhism of delusion. Examples of the false Dharma are very common, and on noticing them, one should keep well clear of them, unless one has the spiritual strength to compassionately and wisely correct them. Here are some local “shadows” cast by false Dharma,161 that is to say:

The Buddhism of greed: Monastics breaking the celibacy rule or handling money;162 money-centred Buddhism; structured fees for blessings and prayer for the dead; favouring rich and influential devotees and neglecting the “lesser” devotees.163

The Buddhism of hate: Labelling other groups as “inferior” (hīna, yāna, etc); the conceit that only one’s meditation works and others do not; regarding those one dislikes as being unamenable (“cannot change”) (lacking in compassion); the conceit, “I keep the precepts better than you do”; showing respect to others according to status, skin, etc (measuring others).

The Buddhism of delusion: Seeking refuge outside of ourself (such as spirits, amulets and relics); relying on others (including the teacher) to be “saved” (a place reserved in heaven, etc); worshipping relics without wisdom and without practising the Dharma;164 doing “good
works” but not keeping the precepts; the conceit, “I meditate better than you do”; respecting the teacher above the teaching;165 misquoting the Dharma (vague Buddhism).

3.5 The true Dharma cannot be found outside of oneself, but is found only within oneself.166 We have to close our eyes and see the inner stillness and clarity. We must constantly reflect on impermanence of both oneself and the world so that we are liberated in this life itself.167

§4 “What do you think, Kālāmas ...” [also §§5, 6, 7, 10, 11, 12, 13]

These are the passages of emphatic affirmation (avadhāraṇa)168 [Comy 7], and are of 2 types: the first set of 4 consecutive passages (§§4-7) affirms what are unwholesome, while the second set (§§10-13) affirms what are wholesome.

In the following section [Comy 7], the Buddha emphatically affirms what is morally unwholesome on a broader social level.

§7 “What do you think, Kālāmas ... So indeed it is to us in this matter” [Also §13]

1 The Sutta has 2 “moral refrains”—emphatic statements on moral virtue on a broad social level—that is as a universal truth. Moral Refrain 1 [§7], the “emphatic rejection” of moral vice, reads as follows:

This whole section reads:

“What do you think, Kālāmas, are these things wholesome or unwholesome?”

“Unwholesome, bhante.”

“Blamable or not blamable?”

“Blamable, bhante.”

“Censured or praised by the wise?”

“Censured by the wise, bhante.”

“These things, fully undertaken, do they bring about harm and suffering?”

“These things, bhante, fully undertaken, bring about harm and suffering for a long time.

So indeed it is to us in this matter.” (evaṁ no ettha hotī) [§7]

Moral Refrain 2, the “emphatic affirmation” of moral virtue, is just the opposite statement [§13].

2 The Udāna Commentary, in its explanation of the term evaṁ, gives this passage as an example of an emphasis (avadhāraṇa) (UA 7). This is a vital stage in the “word” (pada) learning process, so that the text (vyañjana) is understood in context (attha). The exercise begins with partial rejection of the following:

§4 on the un wholesomeness of greed,
§5 on the un wholesomeness of hate, and
§6 on the un wholesomeness of delusion,

and climaxes with the full affirmation of §7.

165 See eg Gārava S (S 6.2/1:138-140) = Uruvelā S 1 (A 4.21/2:20 f), SD 12.3.
166 See Mahā Parinibbāna S (D 16/2.26), SD 9, also (6c).
168 See UA 7, commentary on evaṁ.

http://dharmafarer.org
In repeating these key points, the Kālāmas not only show their understanding of the points, but also their acceptance of them on a broader social level. This is highly significant if we note that the preceding section [§§3.2-6] addresses personal accountability and how our actions affect others.

In this section, how our actions affect others is stressed. In other words, right view is not about endorsing opinions and enforcing dogmas, but living a virtuous life, being a truly good person. This is something clearly universal that any person with some level of wisdom would notice this and agree with it. Having established this consensus, the Buddha goes on to the next stage of his admonition.

See also Comy §4.

§8 “It is for this reason that I have spoken thus”

After exhorting the Kālāmas on the 3 unwholesome roots, that they are to be rejected, the Buddha declares that it is for this reason that he has spoken on the 10 doubtworthy points. That is to say, these points are not to be taken as a summary rejection of any teaching, nor as an excuse for a carte-blanche or “self-assembled” Buddhism, but as a reminder and criteria for testing the moral worthiness of a statement—that they are not blameworthy, not censured by the wise, and do not cause one harm and suffering—before accepting it.

And again at the close of the section, the Buddha reiterates: “Thus I have spoken, Kālāmas; it is for this reason that I have spoken thus.” [§8]

§9.2 “When you know for yourselves, Kālāmas, ‘These things are wholesome ... not blamable ... praised by the wise ... bring good and happiness’”

This is the positive counterpart of the unwholesome qualities (that are to be rejected) [§3b & Comy 3b.2]. None of the 10 doubtworthy points, singly or otherwise, can really tell us the moral worthiness of a statement. One has to examine them for oneself whether they are wholesome, not blamable, praised by the wise and bring good and happiness—that is, it is personally and collectively wholesome. Otherwise, it should be rejected. [§§3,2.1]

§13 “What do you think, Kālāmas, ...”

This section comprises the emphatic affirmation of the morally wholesome views of statements. The approach is just the opposite of that explained above [Comy 7 “What do you think, Kālāmas, ...”].

§14 “It is for this reason that I have spoken thus”

1 This section is the positive counterpart of §8. After exhorting the Kālāmas on the 3 wholesome roots, and that they are to be accepted, the Buddha declares that it is for this reason that he has spoken on the 10 doubtworthy points. That is to say, these points are not as a summary rejection of any teaching, nor as an excuse for a carte-blanche or “self-assembled” Buddhism, but as a reminder and criteria for testing the moral worthiness of a statement—that they are wholesome, praised by the wise, bring one good and happiness—before accepting it.

And again, at the close of the section, the Buddha reiterates: “Thus I have spoken; it is for this reason that I have spoken thus.” [§14]

2 Let us now look at the relevant passages as a whole. §§4-6 respectively show that through being goaded by greed, hate or delusion, we break the 5 precepts and “makes others do likewise.” And this will bring us harm and suffering (that is, karmic fruits) for a long time. This point is clearly reaffirmed in §7. The Buddha reiterates
his rationale by repeating the 10 doubtworthy points that should be rejected when they lack moral worth [§8-9.1]. The positive aspects, that is, the moral wholesomeness of the 10 points are then reaffirmed [§§9.2-14].

4 This moral training is not an end in itself, but forms the vital basis for mental training, here stated as the cultivation of the divine abodes, which follows.

3 We see here a progressive teaching that first points out what are to be rejected, and then what are to be accepted. This is the section on moral training, detailed in the Veḷu, dvāreyya Sutta (S 55.7), which instructs on the proper practice of moral virtue, that is, one (1) refrains from breaking the precepts, (2) one exhorts others from breaking the precepts, and (3) one gives positive strokes to those for keeping the precepts.\(^{169}\) §§10-13 below affirms the wholesome roots, elaborated in the Śāleyyaka Sutta (M 41), that is, without breaking a precept, one goes on to act on its positive virtue, summarized in Table 14.

Table 14 The precepts and their virtues (M 41,11-14/1:287 f), SD 5.7

§15.1 (1) The divine abodes

The Kālāmas, having understood and accepted these basic principles of moral virtue [§§3b-14], are now ready for mental cultivation, which understandably consists of the four divine abodes (brahma, vihāra), those qualities conducive to beneficent leadership and wholesome community life; that is to say, lovingkindness, compassion, gladness and equanimity. These practices lead to the “breaking of barriers” between self and other, and so greatly helps in the forging of spiritual friendship and a wholesome community.

The Buddha has very good reasons for teaching the Kālāmas the cultivation of the divine abodes as their first spiritual exercise. First of all, it is a pre-Buddhist practice that the Buddha has adopted as it is not against his teachings. Secondly, the divine abodes help in the cultivation of inner stillness and wholesome social emotions. The cultivation of divine abodes serves as a fertile ground for a still mind for developing insight in due course.

\(^{169}\) S 55.7/5:352-356 (SD 1.5).
“thus free from covetousness, free from ill will, unconfused, clearly comprehending, mindful ...”

1 In Pali, this passage is evam vigatábhijjo vigatávyāpādo asammūlo sampajāno paṭissato. From the context, this short but significant passage clearly refers to the overcoming of the 5 mental hindrances, thus:

<table>
<thead>
<tr>
<th>Mindfulness</th>
<th>The mental hindrance overcome</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1) free from covetousness vigatábhijjo</td>
<td>sense-desire kāma-c, chanda</td>
</tr>
<tr>
<td>(2) free from ill will vigatávyāpādo</td>
<td>ill will vyāpāda</td>
</tr>
<tr>
<td>(3) unconfused asammūlho</td>
<td>sloth and torpor thīna, midha</td>
</tr>
<tr>
<td>(4) clearly comprehending sampajāno</td>
<td>restlessness and worry uddhacca, kukkucca</td>
</tr>
<tr>
<td>(5) mindful paṭissato</td>
<td>doubt vicikicchā</td>
</tr>
</tbody>
</table>

2 The relationships (reverse pairings)—a chiasmus, as it were—between the 2 sets can be graphically represented thus:

viharati ātāpi sampajāno satimā, vineyya loke abhijjhā, domanassam

evam vigatábhijjo vigatávyāpādo asammūlo sampajāno paṭissato

Fig 15a.2 Mindfulness formula and the hindrances

The first 2 factors of the mindfulness formula form the well known dvandva (copulative compound), abhijjhā-domanassa (covetousness and displeasure), commonly found in the important satipatthana stock phrase: viharati ātāpi sampajāno satimā, vineyya loke abhijjhā, domanassam, “he dwells (viharati) exertive [ardent], clearly comprehending, mindful,”170 (observing the body in the body; | feeling in the feelings; | the mind in the mind; | dharmas in the dharmas), putting away covetousness and displeasure for the world.”171

3 The Commentaries on the Satipaṭṭhāna Sutta say that the dvandva, abhijjhā-domanassa, “covetousness and displeasure [discontent],”172 signifies the first 2 hindrances (nīvaranā)—sensual desire and ill will —the principal hindrances to be overcome for the practice to succeed.173 Although “covetousness and displeasure” are taken by the Sutta Commentaries to refer to only the first two mental hindrances in the early suttas, the dvandva is clearly a synecdoche (short form) for all the 5 hindrances (pañca, nīvaranā) themselves, whose removal leads to mindfulness (sati), mental concentration (samādhi) and dhyana (jhāna).

---

171 Tasmā-t-īha tah bhikkhu kāye kāyanupassī viharati ātāpi sampajāno satimā vineyya loke abhijjhā, domanassam. See Satipaṭṭhāna Suttas, SD 13.1(4.2), esp 4.2e.
172 Analayo, Satipaṭṭhāna: The direct path to realization, has “desire and discontent” (2003:3). See also Gethin, The Buddhist Path to Awakening, 2001:49 f.
4 The Netti-p,pakaraṇa, on the other hand, points out, four of the spiritual faculties (indriya) are present in the same basic satipatthana formula:

\[
\begin{align*}
\text{ātāpi,} & \quad \text{that is to say, the faculty of effort [energy];} \\
\text{sampajāno,} & \quad \text{that is to say, the faculty of wisdom;} \\
\text{satimā,} & \quad \text{that is to say, the faculty of mindfulness;} \\
\text{vineyya loke} & \quad \text{that is, the faculty of samadhi. (Nett §481 f/82 f)} \\
\text{abhijjhā,domanassa,} & \quad \text{that is, the faculty of samadhi.} \\
\end{align*}
\]

It is clear then that abhijjhā,domanassa refers to the mental hindrances: for when they are all overcome, even if temporarily, the result is samadhi.

5 The remaining opposing pairs of the mindfulness formula and the 5 mental hindrances are exact antonyms. However, in terms of actual meditation practice, we can see that they do work together as a set. Of course, we could pedantically form almost perfect antonymous pairs with (3) unconfused against doubt, (4) clearly comprehending against restlessness and worry, and (5) mindful against sloth and torpor. The form is that the mental hindrances are overcome altogether, not one by one.

6 Another interesting point to note is that here (in the Kesa,puttiya Sutta) the phrase vigatābhijjhīya vigata,-vyāpādo asammiḥo sampajāno patissato is mentioned in connection with the 4 divine abodes (brahma,-vihāra), and this is still a part of the meditation process. The basic satipatthana formula viharati ātāpi sampajāno satimā, vineyya loke abhijjhā,domanassa, however, describes the result of a hindrance-free mind that is just a moment away, as it were, from dhyana. Indeed, if the divine abodes are cultivated properly, the next stage would be described by the basic satipatthana formula. The divine abodes practice can lead one to dhyana.

§15.1 (3) “Thus above, below, in between, everywhere and to everyone as well as to himself, he dwells pervading the whole world with a mind (of lovingkindness, ... of compassion, ... of gladness, ... of equanimity) that is vast, great, boundless, free from enmity, free from ill will”

1 Pali: \textit{Iti uddhaṁ adho tiriyaṁ sabbadhi sabb’attatāya}⁷⁴ sabbāvanto lokāṁ (mettā,sahegatenā, | karunā,-sahegatenā, | ātā,sahegatenā, | upekhā,sahegatenā) cetasā vipulena mahaggatena appaṁanena averena avyāpajjhena pharitvā viharati.

This important refrain repeats at the end of each of the four passages of the divine abodes, showing how each abode becomes fully developed. In simple terms, the phrase “above, below, in between, everywhere” (uddham adho tiriyaṁ sabbadhi) refers to the directional radiating (pharitvā) of the divine abode. This divine quality should be cultivated “to everyone as well as to himself” (sabb’attatāya): the quality is only total and boundless when it also includes oneself. For, one cannot pervade the universe (meaning both the world of beings and one’s awareness of that world) if one does not have that quality oneself.¹⁷⁵

2 The phrase “a mind ... vast, great, boundless, free from enmity, free from ill will” (cetasā vipulena mahaggatena appaṁanena averena avyāpajjhena) describes a meditator who is fully focussed. The word “vast” or “bountiful” (vipul) means he has attained samadhi or full concentration, and as such is “great” (mahaggata),

---

⁷⁴ For a grammatical analysis, see §15a(1)n above.
⁷⁵ On how this practice can lead to spiritual liberation, see Brahma,vihāra S (A 10.208/5:299), SD 2.10.
that is, free (at least temporarily) of all the mental hindrances,\textsuperscript{176} and thereby attained to dhyana. Only such a
mind can truly be “boundless” or “measureless” (appamana) because, at least momentarily, going beyond
conceit, the meditator does not measure anyone but sees all beings as they really are, without regarding any-
one as a stranger or an enemy, or harbouring any negative thought: he is “free from enmity, free from ill will”
(averena avyāpajjena).

3 God-religions, especially Christianity, claim to have a “world vision” to evangelize all men out of “Christian
love,” but the reality is that the power mode is at work here. Such a view is rooted in the idea that one’s God is
the best, hence, one, too, is supreme amongst othe and should dominate others. In the Buddhist conception of
life, non-humans (such as animals) are included, too, and they too need liberation and can find liberation. A
sentiment like “Christian” love has, by its very definition, to be limited, and as such cannot be universal or
selfless love (agape). Lovingkindness, on the other hand, is not “Buddhist” love, but simply an unconditional
acceptance of all beings.

4 In being unconditional in one’s lovingkindness, one does not impose one’s values or even salvation upon
another. One simply sees in all beings (not just humans) their innate ability to realize their true nature and so
be liberated. They are not born in “sin,” but in ignorance, and it is this ignorance that fuels craving, that is,
seeking for fulfillment in the external world based on the false notion that there is an unchanging entity (a soul,
etc). If ideas can heal, then just such an idea of unconditional love is more healing than the God-idea has ever
been throughout mankind’s history.

§15.2 “his mind without enmity thus, without ill will thus, uncorrupted thus, purified thus—wins these 4 self-assurances right here in this life”

Pali: Evam aver, citto evam avyāpajjha, citto evam asaṅkhiliṅtha, citto evam visuddha, citto, tassa diṭṭh’eva dhamme cattāro assāśa adhigatā honti.

1 HOW TO FULLY BENEFIT FROM THE 4 SELF-ASSURANCES

1.1 This sentence shows the spiritual progression from the divine abodes practice to the benefitting from the 4
self-assurances (assāsa).\textsuperscript{177} This is a subtle point often missed if not for a close study. That is to say, to truly
benefit by way of the four self-assurances, is not merely a belief in karma and rebirth—this would be an intel-
lectual shift, like believing in a God-ideal So what else is needed here?

1.2 To fully benefit from the 4 self-assurances, we must go through an emotional shift (or a positive change of
heart), by way of the four divine abodes: we become a person of lovingkindness, compassion, gladness and
equanimity (or, at least of lovingkindness). How does this emotional shift occur? We have already seen how the
suppression of the hindrances, even if only temporary, leads to the attainment of dhyana [15a.2]. It is only
when we have attained at least the 1st dhyana that we will truly experience the full feeling of lovingkindness
without barriers.

\textsuperscript{176} See Intro 5.3(2)n.

\textsuperscript{177} Assāsa, (1) the in-and-out-breath; (2a) comfort, solace (A 4:182,29, 184,32-185,4; KhpA 22,4; (2b) self-confidence, self-
assurance (M 1:64,3 = 2:149,11; S 2 2:50,25; A 1:192,13-25); (2c) ease, relief (J 6:4,23, 304,18, 587,1). Here 2b applies. See
CPD, DP sv.
1.3 In fact, the cultivation of the first three divine abodes—lovingkindness, compassion and gladness—can bring us dhyanas right up to the third level. The fourth divine abode, equanimity, can bring us to the 4th dhyan-na.\(^{178}\) When we have experienced dhyanas, we truly know what happiness really is. Happiness (sukha) not only helps us to attain samadhi during meditation, but it is the best prevention against breaking the precepts! When we are truly happy, we do not think of harming ourselves or others, and we sustain a wholesome ambience wherever we go. It is such a person who fully benefits from the 4 self-assurances.

2 HOW THE UNAWAKENED CAN BENEFIT FROM THE SELF-ASSURANCES

2.1 Even an unawakened being who has mere faith in karma and rebirth benefits from the 4 self-assurances. The Buddha’s reasoning here is very simple: To believe in karma is to accept the fact that our actions (conscious and unconscious)\(^{179}\) are morally efficacious, that is, we are responsible for our actions. To believe in rebirth means that we live understanding that in some way, our past karma contributes to our present being, and that the karmic seeds we now create can fruit again in future lives. So how we live now—how we conduct ourselves through thought, word and deed—has a direct impact on the quality of our next life and those to come. Believing in karma and rebirth, as such, provides the incentive for quality control over our life. This is, in fact, another way of talking about living a morally virtuous life.

2.2 As noted a number of times before,\(^{180}\) moral virtue forms the basis for effective mental training [Intro 3.5]: it is easier to meditate if we keep our precepts and practise their virtues, too [Comy 14]. Even if we think we are not a “saint,” that maybe our moral virtue is not as sterling as we would have liked it to be, we can still, indeed, it is to our great advantage, to practise a form of meditation called “mindfulness practice” or satipatthana (satipaṭṭhāna).\(^{181}\) A very simple but effective form of mindfulness practice is described in the Dīgha,jānu Sutta (A 8.54) as the layman’s accomplishment of wisdom (pañña,sampāda) as follows:

Here, Vyagghapajja, the son of family is wise, possesses wisdom directed to (noting) the rising and falling away (of phenomena) that is noble and penetrative, leading to the complete destruction of suffering.  
(A 8.54/4:285), SD 5.10

2.3 The benefit of this practice is clearly better than even that of the divine abodes, as attested by the Velāma Sutta (A 9.20):

And, householder, even though the brahmin Velāma gave those great gifts, and even if he were to cultivate a heart of lovingkindness for just as long as it takes to tug at the cow’s teat (to milk it), greater would be the fruit if he were to cultivate the perception of impermanence for even the moment of a finger-snap!  
(A 9.20,11/4:395 f), SD 16.6\(^{182}\)

In short, we can still benefit from the self-assurances even as an ordinary person who makes every effort to live a morally virtuous life and keep our minds healthy.

\(^{178}\) See Vism 9.119/324 (where the “highest limit” of each abode is discussed); also Bhāvanā, SD 15.1 (Diagram 2). See Metta,sahagāta S (S 46.54/5:115-121), SD 10.11 esp (3) (Freedom through the divine abodes).

\(^{179}\) See The unconscious, SD 17.8b.

\(^{180}\) Intro 5.1; Comy 3b.1; Comy 14.

\(^{181}\) Sati’paṭṭhāna usu tr as “focus of mindfulness,” but here I take it as a simple practice as in the “full awareness” section of Mahā Satipaṭṭhāna S (D 22.4/2:292), SD 13.2 & Satipaṭṭhāna S (M 10,8/1:57), SD 13.3.

\(^{182}\) “For even the moment of a finger-snap,” acchārā,sanghāto,mattāṁ. Also in Cūḷ’accharā S (A 1.6.3-5/A 1:10), in the same context of lovingkindness. See SD 16.6 Intro (2-4).
§16 The 4 self-assurances

1 The Buddha’s 4 self-assurances are the best spiritual insurance that any religious or philosophical system can ever give. They are the best, not only in the theoretical or philosophical sense, but in a practical and beneficial way. They are the ground rules by which we can live together as a healthy family, community and society. Unlike Pascal’s wager [Intro 7], the 4 self-assurances or spiritual solaces (assāsa), have a gentle and compassionate tone, giving the thinker a free choice of what to believe. At the same time, the Buddha emphatically affirms the central place of moral virtue.

2 Moral virtue and ethical living make communal living and society possible. In the Buddhist view, morals and ethics are founded on the principle of the “world protectors” (lokapāla), that is, moral shame and moral fear, where one’s actions are neither “blamable,” entailing bad karma (one has moral fear), nor “censured by the wise” (one has moral shame) [3b.2].

Without moral virtue, neither civilization nor society is possible. Without some level of social organization, no God-idea is possible: for the God-idea is always closely associated with political power and tribal supremacy. Moral virtue is, however, necessary for social order and personal development, whether we believe in a God or not. Understandably, the 4 self-assurances clearly stand way above Pascal’s wager which does not allow one any choice at all!

The serious danger with the God-idea is that it makes all things possible—for those who define God and who control others in God’s name. History gives us centuries of unimaginable sufferings and losses of our inhumanity towards our own kind. We start to become truly human only after we have transcended this “power” mode of human imagination.

§17 The Kālāmas’ exultation

In a well known stock phrase, the Blessed One is described as teaching in a progressive affective sequence: he is said to have “instructed (sandasseti), inspired (samādapeti), roused (samuttejeti) and gladdened (sampahaṁseti) ... with a Dharma talk.” This is also known as the “Buddha’s grace” (buddha, lilā) when teaching.

We can actually see the sequence of the Buddha’s discourse here in the Kesaputtiya Sutta in this manner:

<table>
<thead>
<tr>
<th>instructed (sandasseti)</th>
<th>§3.1:</th>
<th>the 10 doubtworthy points;</th>
</tr>
</thead>
<tbody>
<tr>
<td>inspired (samādapeti)</td>
<td>§§3.2-9.1:</td>
<td>the 3 unwholesome roots (to be rejected);</td>
</tr>
<tr>
<td>roused (samuttejeti)</td>
<td>§15.2-16:</td>
<td>the 4 divine abodes;</td>
</tr>
<tr>
<td>gladdened (sampahaṁseti)</td>
<td>§17:</td>
<td>the 4 self-assurances.</td>
</tr>
</tbody>
</table>

The point here is that one teaches not merely to give knowledge (the cognitive leap), but also joy (the affective openness).

---

183 The contents of the Buddha’s teachings can be said to comprise of a progressive cognitive sequence, otherwise known as the “progressive talk” (ānupubbī,kathā): see Intro 3.1.
185 This is a comy term: DA 1:41; UA 105; VvA 217; ThA 33.
§18 The Kālāmas go for refuge

With minor variations, this section is a stock passage found throughout the Nikāyas, showing that the listener or audience has understood and appreciates the Buddha’s or a noble disciple’s teaching.\(^{186}\)

1 **“EXCELLENT, BHANTE GOTAMA! EXCELLENT, BHANTE!” (Abhikkantaṁ bhante gotama, abhikkantaṁ bhante).** \(^{187}\)

The exclamation “excellent!” (abhikkanta) reflects the Kālāmas’ awe and joy—that is, wonder—at the Buddha’s teaching, making it what we might call a “religious experience” for them. As the Buddha declares in the Gotamaka Cetiya Sutta (A 3.123): “Bikshus, I teach the Dharma accompanied by wonders (sappāṭihāriya), not without wonders.” [Comy 3.1(10)]. This is a classic example of the greatest of miracles, that of instruction (anusāsani,pāṭihāriya).\(^{188}\)

It is interesting that they address the Buddha by his clan name, Gotama, which suggests a sense of cordiality they have towards him. They would not show such familiarity if they were ordained monastics (monks or nuns). However, it also means that, if they have attained any level of realization, it would be only streamwinning. See (8) below where they go for refuge “for life.”

2 **“JUST AS IF, MASTER GOTAMA, ONE WERE TO PLACE UPRIGHT WHAT HAD BEEN OVERTURNED” (seyyathāpi bho gotama nikujjitaṁ vā ukkujjeyya).**

Notice that the Kālāmas’ uninhibited exultation is expressed in various colourful imageries, rather than in measured conceptual evaluations. This is the first of four consecutive similes in this stock passage.

Soon after the Great Awakening, Brahmā Sahampati approaches the Buddha and invites him to teach the Dharma to the world, reminding the Buddha that false teachings are widespread to the detriment of the many, and that there are many “with little dust in their eyes” who would benefit from spiritual teachings:

In the past there has appeared (until now) in Magadha
An impure Dharma devised by those still tinted.

Throw open this door to the deathless!
Let them hear the Dharma discovered by the stainless one!\(^{189}\)

3 **“OR, WERE TO REVEAL WHAT WAS HIDDEN” (paṭicchannāṁ vā vivareyya).**

The Commentaries\(^{190}\) say that since the passing of the previous Buddha, Kassapa, the Teaching was forgotten, “hidden by the thicket of wrong views,” and our Buddha now has revealed it again. All the buddhas teach the same Dharma, leading to the same goal. In the Uppāda Sutta (A 3.134), the Buddha declares that whether Buddhas arise or not, it remains a fact that the world is impermanent and suffering, and that all things are not self.\(^{191}\) The Buddha, having arisen fully awakened in this world, declares these truths to it.\(^{192}\)

\(^{191}\) Sabbe sankhārā aniccā, sabbe sankhārā dukkhā, sabbe dhammā anattā: see also Dh 277-279.

\(^{192}\) A 3.134/1:286. On how the Buddha teaches the 3 characteristics, see Alagaddūpama S (M 22,22-29/1:137-139), SD 3:13.
4 “OR, WERE TO SHOW THE WAY TO ONE WHO WAS LOST” (mūlaṃhassa vā maggaṃ ācikheyya).

The meaning here is that to those who have fallen into wrong ways, the Buddha directs them to the right one by disclosing the way to heaven (through the four divine abodes) §15 and to liberation (such as through understanding the nature of impermanence) [Intro 5.3(2)]. The path imagery is a popular one in Buddhism: the way to liberation is known as the noble eightfold path (ariya atthaṅgika magga).193

The Nagara Sutta (S 12.65) gives the famous parable of the city, where nirvana is represented as a lost frontier city, linked by an ancient path through deep jungle. The city is still inhabited by wise citizens (the saints), and the ancient path (the noble eightfold path) is rediscovered by a man who rushes back to civilization to tell others to clear the path and renovate the city (that is, to practise the True Teaching).194

5 “OR, WERE TO HOLD UP A LAMP IN THE DARK SO THAT THOSE WITH EYES COULD SEE FORMS” (andha, kāre vā tela, -pajjotam dhāreyya, cakkhumanto rūpāni rupāṇi dakkhinti ti).

In teaching the Dharma, the Buddha is like one who brings a bright lamp to one lost in the dark or half-light, that is, bringing understanding to one who was lost in the darkness of ignorance or dimness of delusion. This imagery again aptly shows how the Dharma works: the truth is always there, and we only need to open our inner eye to see it. To elaborate on the lamp imagery, one could add that the true lamp is one’s own mind, and the Buddha’s teaching is the flame that lights it up so that we become lamps unto ourselves.

6 “IN THE SAME WAY, IN NUMEROUS WAYS, HAS THE DHARMA BEEN MADE CLEAR BY MASTER GOTAMA” (evam eva bhotā gotamena aneka, pariyaṭṭhena dhammaṃ pakkāsito).

In a stock passage, it is said that “the Blessed One instructed (sandassetvā), inspired (samādapetvā), roused (samuttejetvā) and gladdened (sampahāṃsetvā) ... with a Dharma talk.”195 The Commentaries explain this action sequence: by instructing, the Buddha dispels the listener’s delusion; by inspiring him, heedlessness is dispelled; by rousing him, indolence is dispelled; and by gladdening, brings the practice to a conclusion [17]. In short, when we teach Dharma to benefit others, we should do our best to bring instruction, inspiration, motivation and jubilation to the audience. These four qualities, according to the Ānanda Sutta (A 3.61), form the sixth or last of the ideal skills of a Dharma speaker.198

7 “WE GO TO MASTER GOTAMA FOR REFUGE, TO THE DHARMA, AND TO THE COMMUNITY OF MONKS” (ete mayaṃ bhavantaṃ gotamaṃ saranaṃ gacchāma, dharmmaṃ ca bhikkhu, saṅghaṃ ca).

When religious conversion is imposed on another in a situation where “one believes so that one can understand,” the convert is but a shadow of the faith, blindly, unthinkingly and lifelessly following its every gesture, and knowing no other. Here we see the Kālāmas, having understood the Buddha’s teaching, jubilantly celebrate their self-realized faith through knowing, and take refuge in the 3 jewels.199

194 S 12.65/2:104-107 @ SD 14.2.
196 Eg DA 1:293; cf VA 1:65; MA 2:35.
197 See L S Cousins, in his review of The Middle Length Discourses of the Buddha (tr Nhānamoli & Bodhi) in JBE 4, 1997:272, where gives a slightly different listing of the above.
198 A 3.61/3:361 f. See Sila, sampannya S (It 4.1.5/107), where these qualities are part of a morally virtuous Dharma teacher that would benefit others.
199 On going for refuge, see SD 3.1-3.
8 “MAY MASTER GOTAMA REMEMBER US AS LAY FOLLOWERS WHO HAVE GONE TO HIM FOR REFUGE FROM THIS DAY FORTH FOR LIFE” (upāsake no bhavaṁ gotamo dhāretu ajjha-agge pāṇ’upete saranāṁ gate’tī).

8.1 Considering that using this stock formula the Kālāmas (or anyone else) request the Buddha to be a witness to their going for refuge “for life” (pāṇ’upete, alternately, “as long as life lasts”) — this reflects the depth of their faith. It is likely that this also marks the attaining of streamwinning. Then, such a refuge-going is “supramundane” (lok’uttara saranāgamana) (Dh 190-192). If the refuge-goer is still a worldling, then, the refuge-going is a “mundane” one (lokiya saranāgamana) (D 20,4/2:255).

Table 8. Right was of refuge-going

8.2 The Commentaries mention another 2 kinds of refuge-going, by way of breach (duvidho saranāgamana,-bheda), namely: the blameworthy (sāvajja) and the blameless (anavajja): they both apply only to worldly refuge-goers, that is, those who have not attained any spiritual state. The blameworthy refuge-goer is one who, having

---

201 These 2 types of refuge-going (duvidham sarana,gamanam) are mentioned in Comys (MA 1:132, 134; KhA 17).
202 Evam vutte Brahmāyu brāhmāno uttihāy’āsanā ekarīsamat utterā,saṅgaṁ karitvā yena bhagavā ten’ahijalim pānāmavā tikkhattum udānam udānesi: nemo tassa bhagavato arahato sammā,sambuddhassa… (×3). (VA 1:230-234; MA 1:133-137)
203 So ahaṁ vicarissāṁ gāmā gāmāṁ purā purāṁ namassamānā sambuddhāṁ dhammassa ca sudhammatan ti. (KhA 16 f)
204 Comy to Bhaddiya S (A 4.193/2:190-194), SD 35.10 (which contains the same 10 doubtworthy points & §§3.2-15.1) says that at the conclusion of the discourse, Bhaddiya becomes a streamwinner. (AA 3:173)
205 Eg MA 1:135; KhA 17.
206 234; MA 1:133-137)
gone for refuge, “turns to another teacher,” that is, either he does not keep up a moral life, or converts to another religion. This, of course, refers to the mundane refuge-goer who is still weak in faith. The blameless refuge-goer is one who remains so until death, but does not yet gain any spiritual state.

8.3 In most cases, however, refugee-going is a mark of profound joy (pasāda) and faith (saddhā), and as such it greatly conduces to our spiritual development. This is because they give the 3 jewels the highest priorities in their lives, thinking: “This is my refuge, this is my final goal” (esa me saraṇaṁ esa me parāyanaṁ). The Commentaries record various ways by which the early disciples go for refuge, the main ways as shown in Table 8.
